## SEMESTER 2

## PERIOD: MAY 2021-AUGUST 2021

## RAJAGIRI SCHOOL OF ENGINEERING \& TECHNOLOGY <br> Department of Information Technology, Programme: Artificial Intelligence \& Data Science

## Vision

To evolve into a centre of excellence in information technology by creation and exchange of knowledge through leading edge research, innovation and services, which will in turn contribute towards solving complex societal problems and thus building a peaceful and prosperous mankind.

## Mission

To impart high quality technical education, research training, professionalism and strong ethical values in the young minds for ensuring their productive careers in industry and academia so as to work with a commitment to the betterment of mankind.

## Programme Educational Objectives (PEO)

Graduates of Artificial Intelligence \& Data Science program shall
PEO 1: Have strong technical foundation for successful professional careers and to evolve as keyplayers/ entrepreneurs in the field of information technology.
PEO 2: Excel in analyzing, formulating and solving engineering problems to promote life-long learning, to develop applications, resulting in the betterment of the society.

PEO 3: Have leadership skills and awareness on professional ethics and codes.

## Programme Outcomes (PO)

## Artificial Intelligence \& Data Science Program Students will be able to:

PO1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems. PO2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6.The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
PO7.Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO 9.Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
PO11.Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## Program Specific Outcomes (PSO)

Artificial Intelligence \& Data Science Program Students will be able to:
PSO1: Apply the fundamentals of science, engineering and mathematics to understand, analyze and develop solutions in the areas related to artificial intelligence and data science for optimal design of intelligent systems.

PSO2: Design and Implement appropriate techniques and analytic tools for the integration of intelligent systems, with a view to engaging in lifelong learning for the betterment of society.

PSO3: Practice professional ethics in applying scientific method to model and support multi-disciplinary facets of engineering and its societal implications.

## VECTOR CALCULUS, DIFFERENTIAL EQUATIONS AND TRANSFORMS

## COURSE INFORMATION SHEET

MAT102 VECTOR CALCULUS DIFFERENTIAL EQUATIONS AND TRANSFORMS

| PROGRAMME: COMMON | DEGREE: BTECH |
| :---: | :---: |
| PROGRAMME: AD | UNIVERSITY: A P J ABDUL KALAM TECHNOLOGICAL UNIVERSITY |
| COURSE: VECTOR CALCULUS DIFFERENTIAL EQUATIONS AND TRANSFORMS | SEMESTER: II CREDITS: 4 |
| COURSE CODE: 100908/MA200A REGULATION: UG | COURSE TYPE: CORE |
| COURSE AREA/DOMAIN: ENGINEERING MATHEMATICS | CONTACT hours/Week. HOURS: $\quad 3+\mathbf{1} \quad$ (Tutorial) |

## SYLLABUS:

| UNIT | DETAILS | HOURS |
| :--- | :--- | :--- |
| I | Module 1 (Calculus of vector functions) <br> (Text 1: Relevant topics from sections 12.1, 12.2, 12.6, 13.6, 15.1, 15.2, 15.3) <br> Vector valued function of single variable, derivative of vector function and <br> geometrical interpretation, motion along a curve-velocity, speed and <br> acceleration. Concept of scalar and vector fields, Gradient and its properties, <br> directional derivative, divergence and curl, Line integrals of vector fields, work <br> as line integral, Conservative vector fields, independence of path and potential <br> function(results without proof). | 9 |
| II | Module 2 (Vector integral theorems) <br> (Text 1: Relevant topics from sections 15.4, 15.5, 15.6, 15.7, 15.8) <br> Green's theorem (for simply connected domains, without proof) and applications <br> to evaluating line integrals and finding areas. Surface integrals over surfaces of <br> the form $\mathrm{z}=\mathrm{g}(\mathrm{x}, \mathrm{y}), \mathrm{y}=\mathrm{g}(\mathrm{x}, \mathrm{z}$ or $\mathrm{x}=\mathrm{g}(\mathrm{y}, \mathrm{z})$, Flux integrals over surfaces of the <br> form $\mathrm{z}=\mathrm{g}(\mathrm{x}, \mathrm{y}), \mathrm{y}=\mathrm{g}(\mathrm{x}, \mathrm{z}$ or $\mathrm{x}=\mathrm{g}(\mathrm{y}, \mathrm{z})$, divergence theorem (without proof) <br> and its applications to finding flux integrals, Stokes' theorem (without proof) <br> and its applications to finding line integrals of vector fields and work done |  |

|  | (For practice and submission as assignment only: Plots of partial sums of Fourier series and demonstrations of convergence using plotting software) |  |
| :---: | :---: | :---: |
| III | Module- 3 ( Ordinary differential equations) <br> (Text 2: Relevant topics from sections 2.1, 2.2, 2.5, 2.6, 2.7, 2.10, 3.1, 3.2, 3.3) Homogenous linear differential equation of second order, superposition principle, general solution, homogenous linear ODEs with constant coefficientsgeneral solution. Solution of Euler-Cauchyequations (second order only).Existence and uniqueness (without proof). Non homogenous linear-general solution, solution by the method of undetermined coefficients (for the right hand sideof the form $\mathrm{x}^{\mathrm{n}}, \mathrm{e}^{\mathrm{kx}}, \sin a \mathrm{x}, \operatorname{cosax}, \mathrm{e}^{\mathrm{kx}} \sin a \mathrm{x}, \mathrm{e}^{\mathrm{kx}} \cos a x a n d$ their linear combinations), methods ofvariation of parameters. Solution of higher order equations-homogeneous and non-homogeneouswith constant coefficient using method of undetermined coefficient. | 9 |
| IV | Module- 4 (Laplace transforms) <br> (Text 2: Relevant topics from sections 6.1,6.2,6.3,6.4,6.5) <br> Laplace Transform and its inverse ,Existence theorem ( without proof) , linearity,Laplacetransformof basic functions, first shifting theorem, Laplace transform of derivatives and integrals, solution ofdifferential equations using Laplace transform, Unit step function, Second shifting theorems. Diracdelta function and its Laplace transform, Solution of ordinary differential equation involving unitstep function and Dirac delta functions. Convolution theorem(without proof)and its application tofinding inverse Laplace transform of products of functions. | 10 |
| V | Module-5 (Fourier Tranforms) <br> (Text 2: Relevant topics from sections 11.7,11.8, 11.9) <br> Fourier integral representation, Fourier sine and cosine integrals. Fourier sine and cosine transforms,inverse sine and cosine transform. Fourier transform and inverse Fourier transform, basic properties.The Fourier transform of derivatives. Convolution theorem (without proof) | 8 |
| TOTAL HOURS |  | 45 |

## COURSE PREREQUISITES:

| C.CODE | COURSE NAME | DESCRIPTION | SEM |
| :--- | :--- | :--- | :--- |
|  | A basic course in vector calculus,  <br> Differential equations and <br> integration To develop basic ideas on vector <br> differentiation, vector integration <br> ,applications and differential equations. |  |  |

## COURSE OBJECTIVES:

| $\mathbf{1}$ | To familiarize the concepts and applications of differentiation and integration of vector valued <br> functions. |
| :--- | :--- |
| $\mathbf{2}$ | To understand the concept of ordinary differential equations which have many applications in <br> engineering. |
| $\mathbf{3}$ | To apply the basic transforms such as Laplace and Fourier transform which are invaluable for any <br> engineer's mathematical toolbox. |

## COURSE OUTCOMES:

| SNO | DESCRIPTION | Bloom's <br> Taxonomy <br> Level |
| :--- | :--- | :--- |
| CO 1 | Apply theconcept of differentiation and integration of vector <br> valued functions in various fields of Engineering. | Apply <br> (Level 3) |
| CO 2 | Evaluate the surface and volume integrals and learn their inter- <br> relations and applications. | Evaluate <br> (Level 5) |
| CO 3 | Remember and solve homogeneous and non-homogeneous linear <br> differential equations with constant coefficients. | Remember <br> (Level 1) |
| CO 4 | Analyze the Laplace transform and apply them to solve ODEs <br> arising in engineering. | Analyse <br> (Level 4) |
| CO 5 | Understand the Fourier transforms of functions and apply them to <br> solve problems arising engineering | Understand <br> (Level 2) |

## CO-PO AND CO-PSO MAPPING

|  | PO <br> 1 | $\begin{aligned} & \text { PO } \\ & 2 \end{aligned}$ | $\begin{array}{\|l\|} \hline \mathbf{P O} \\ 3 \end{array}$ | $\begin{array}{\|l\|} \hline \text { PO } \\ 4 \end{array}$ | $\begin{array}{\|l\|} \hline \mathrm{PO} \\ 5 \end{array}$ | $\begin{aligned} & \mathrm{PO} \\ & 6 \end{aligned}$ | $\begin{array}{\|l\|} \mathrm{PO} \\ 7 \end{array}$ | $\begin{array}{\|l\|} \hline \mathrm{PO} \\ 8 \end{array}$ | $\begin{array}{\|l\|} \hline \text { PO } \\ 9 \end{array}$ | $\begin{aligned} & \text { PO } \\ & 10 \end{aligned}$ | $\begin{aligned} & \text { PO } \\ & 11 \end{aligned}$ | $\begin{aligned} & \mathrm{PO} \\ & 12 \end{aligned}$ | PSO <br> 1 | PSO <br> 2 | PSO <br> 3 |

## JUSTIFICATIONS FOR CO-PO MAPPING

| MAPPING | LOW/MEDIUM/ <br> HIGH | JUSTIFICATION |
| :--- | :--- | :--- |
| CO 1-PO 1 | 3 | Applying the concept of differentiation and integration of <br> vector valued functions we can solve various types of <br> engineering problems. |
| CO 1-PO 2 | 3 | Vector calculus can be used to reduce complex <br> engineering problems into a simpler one. |
| CO 1-PO 3 | 3 | We can design solutions to engineering problems which <br> involves vector valued functions |
| CO 1-PO 4 | 3 | Using the concept of differentiation and integration of <br> vector valued functions we can analyse and interpret <br> functions of multiple variables in engineering. |
| CO 2-PO 4 | 3 | Apply appropriate techniques in modelling , various <br> complex engineering problems using the techniques in <br> vector calculus |
| CO 1-PO 6 2-PO 3 1-PO 12 | 2 | 3 | | Fundamental knowledge in vector calculus helps to assess |
| :--- |
| various safety issues relevant to the professional |
| engineering practice |

|  |  | be best described by using vector calculus and partial differential equation |
| :---: | :---: | :---: |
| CO 2-PO 5 | 2 | Vector calculus can be used to optimise functions of two or more variables |
| CO 2-PO 6 | 1 | Theconcept of vector calculus helps to assess societal, health, safety, legal and cultural issues. |
| CO 2-PO 10 | 2 | Effective communication helps the engineering community to give and receive clear instructions. |
| CO 2-PO 12 | 2 | Study, experience, and practice of the fundamentals of vector integration will allow for further learning in the context of technological change |
| CO 3-PO 1 | 3 | Basic knowledge of differential equations is used to create mathematical models in order to arrive at an optimal solution |
| CO 3-PO 2 | 3 | Differential equations help to analyse complex engineering problems to reach substantiated conclusions |
| CO 3-PO 3 | 3 | Application of differential equations help in designing solutions for engineering problems |
| CO 3-PO 4 | 3 | Modelling using differential equations can help in better design of research and experiments |
| CO 3-PO 5 | 2 | Differential equations gives the engineer new techniques and methods for prediction and modelling |
| CO 3-PO 6 | 1 | Differential equations can be used to find the optimal solution, or the extrema for various problems |
| CO 3-PO 10 | 2 | Effective presentations and clear instructions can be done using differential equations |
| CO 3-PO 12 | 2 | In the new era of technology, application of differential equations is used in the creation of new knowledge and learning of new techniques |
| CO 4-PO 1 | 3 | Laplace transforms make solving complex differential equations easier |
| CO 4-PO 2 | 3 | Knowledge of Laplace transforms broaden the research literature and information available to the engineer |

| CO 4-PO 3 | 3 | To meet the specified needs for the public health and <br> safety, solutions of differential equations using Laplace <br> transforms can be applied widely |
| :--- | :--- | :--- |
| CO 4-PO 4 | 3 | Laplace transforms are used for interpreting and analysing <br> the data in engineering field |
| CO 4-PO 5 | 2 | 1 |
| CO 4-PO 6 | 1Laplace transforms can be used to create new programs for <br> solving various models and making predictions from them |  |
| CO 4-PO 10 5-PO 12 | 2 | 2 | | Modelling, using differential equations and Laplace |
| :--- |
| transforms can be applied to assess societal, legal and |
| cultural issues. |

## JUSTIFICATIONS FOR CO-PSO MAPPING

| MAPPING | LOW/MEDIUM/ <br> HIGH | JUSTIFICATION |
| :--- | :--- | :--- |
| CO1-PSO1 | 3 | Vector calculus is the basis for algorithms on machine <br> learning and optimization |
| CO2- PSO1 | 3 | Vector calculus is the basis for algorithms on machine <br> learning and optimization |
| CO5-PSO1 | 3 | Fourier transforms are fundamental tools for computer <br> graphics |

GAPS IN THE SYLLABUS - TO MEET INDUSTRY/PROFESSIONAL REQUIREMENTS:

| SI.NO | DESCRIPTION | RELEVANCE <br> TO PO | PROPOSED <br> ACTIONS | RELEVANCE |

COURSE PLAN

| No | Topic | No. of Lectures |
| :---: | :---: | :---: |
| 1 | Module 1: Calculus of vector functions (9 hours) |  |
| 1.1 | Vector valued function of a scalar variable - derivative of vector valued function of scalar variable t-geometrical meaning | 2 |
| 1.2 | Motion along a curve-speed, velocity, acceleration | 1 |
| 1.3 | Gradient and its properties, directional derivative divergent and curl. | 3 |
| 1.4 | Line integrals with respect to arc length, line integrals of vector fields. Work done as line integral | 2 |
| 1.5 | Conservative vector field, independence of path potential function | 1 |
| 2 | Module 2 : Vector integral theorems(9 hours) |  |
| 2.1 | Green's theorem and it's applications | 2 |
| 2.2 | Surface integrals, flux integral and their evaluation | 3 |
| 2.3 | Divergence theorem and applications | 2 |
| 2.4 | Stokes theorem and applications | 2 |
| 3 | Module 3 : Ordinary Differential Equations (9 hours) |  |
| 3.1 | Homogenous linear equation of second order, Superposition principle, general solution | 1 |
| 3.2 | Homogenous linear ODEs of second order witt constant coefficients | 2 |
| 3.3 | Second order Euler-Cauchy equation | 1 |

## ASSIGNMENT QUESTIONS

1.A particle moves along a circular path in such a way that its x - and y -coordinates at time t are $\mathrm{x}=$ $2 \cos t, y=2 \sin t$
(a) Find the instantaneous velocity and speed of the particle at time $t$.
(b) Sketch the path of the particle, and show the position and velocity vectors at time $\mathrm{t}=\pi / 4$ with the velocity vector drawn so that its initial point is at the tip of the positionvector.
(c) Show that at each instant the acceleration vector is perpendicular to the velocityvector.
2.A particle moves through 3-space in such a way that its velocity is $\mathbf{v}(\mathrm{t})=\mathbf{i}+\mathrm{t} \mathbf{j}+\mathrm{t}^{2} \mathbf{k}$ Find the coordinates of the particle at time $t=1$ given that the particle is at the point $(-1,2,4)$ at time $\mathrm{t}=0$.
3.

Use a line integral to find the area enclosed by the ellipse

$$
\frac{x^{2}}{a^{2}}+\frac{y^{2}}{b^{2}}=1
$$

4. Suppose that a curved lamina $\sigma$ with constant density $\delta(\mathrm{x}, \mathrm{y}, \mathrm{z})=$ $\delta 0$ is the portion of the paraboloid $\mathrm{z}=\mathrm{x}^{2}+\mathrm{y}^{2}$ below the plane $\mathrm{z}=$ 1.Find the mass of the lamina.

5. Find the flux of the vector field $\mathbf{F}(x, y, z)=z \mathbf{k a c r o s s}$ the outward oriented sphere $x^{2}+y^{2}+z^{2}=a^{2}$
6. Use the Divergence Theorem to find the outward flux of the vector field $\mathbf{F}(\mathrm{x}, \mathrm{y}, \mathrm{z})$ $=2 x \mathbf{i}+3 y \mathbf{j}+z^{2} \mathbf{k}$ across the unit cube.
7.Use the Divergence Theorem to find the outward flux of the vector field $\mathbf{F}(x, y, z)=x^{3} i+y^{3} j+z^{2} k$ across the surface of the region that is enclosed by the circular cylinder $x^{2}+y^{2}=9$ and the planes $z=0$ and $\mathrm{z}=2$

7. FindtheLaplaceTransformof $(t)=e^{a t}$, where $a$ isaconstant.
8. Findthe Laplacetransform $\{\cos 3 t\}$ for $f(t)=\cos 3 t$.
9. 10.Find the fourierintegral representation definedas

$$
(x)=\left\{\begin{array}{l}
a i f|x|<1 \\
0 i f|x|>1
\end{array}\right.
$$

## MODULE III HOMOGENEOUS DIFFERENTIAL EQUATIONS

## TUTORIAL

Solve the following differential equations.

1. $y^{\prime \prime}-8 y^{\prime}+16 y=0$
2. $4 y^{\prime \prime}-4 y^{\prime}-3 y=0$
3. $y^{\prime \prime}+2 y^{\prime}+5 y=0$
4. $y^{\prime \prime}+8 y^{\prime}-30 y=0$
5. $y^{\prime \prime \prime}-6 y^{\prime \prime}+11 y^{\prime}-6 y=0$
6. $y^{I V}-y=0$
7. $y^{I V}+6 y^{\prime \prime \prime}+9 y^{\prime \prime}=0$

Solve the following initial value problems.
8. $y^{\prime \prime}+y=0 ; \quad y(0)=2, y\left(\frac{\pi}{2}\right)$.
9. $y^{\prime \prime}-3 y^{\prime}+2 y=0 ; \quad y(0)=y^{\prime}(0)=1$.
10. $y^{\prime \prime}+0.2 y^{\prime}+4.01 y=0 ; \quad y(0)=0, y^{\prime}(0)=2$.
11. $y^{\prime \prime}-k^{2} y=0(k \neq 0) ; \quad y(0)=1, y^{\prime}(0)=1$.
12. $y^{\prime \prime}-2 y^{\prime}-3 y=0 ; \quad y(-1)=e, y^{\prime}(-1)=\frac{-e}{4}$.

Verify the solutions of the given differential equations are linearly independent or not also find the basis
13. $4 y^{\prime \prime}+25 y=0$
14. $y^{\prime \prime}+2 y^{\prime}+2 y=0$

Find the second solution of the given differential equation given $y_{1}$. Also find the general solution.
15. $x^{2} y^{\prime \prime}+x y^{\prime}-y=0 ; y_{1}=x+\frac{1}{x}$
16. $x y^{\prime \prime}-(2 x-1) y^{\prime}+(x-1) y=0 ; y_{1}=e^{x}$
17. Show that the functions $x$ and $x \log (x)$ are linearly independent (use Wronskian). Hence form an ODE for the given basis $x, x \log (x)$.

Reduce to first order and hence solve the ODE.
18. $y^{\prime \prime}+\left(y^{\prime}\right)^{3} \cos y=0$.
19. $2 x y^{\prime \prime}=3 y^{\prime}$
20. $y^{\prime \prime}-y^{\prime}=0$
21. $x y^{\prime \prime}+2 y^{\prime}+x y=0, y_{1}=\frac{\cos x}{x}$
22. $y^{\prime \prime}+\left(1+\frac{1}{y}\right)\left(y^{\prime}\right)^{2}=0$.

## ENGINEERING PHYSICS A

## COURSE INFORMATION SHEET- ENGINEERING PHYSICS

| PROGRAMME: <br> ENGINEERING | DEGREE: BTECH |
| :--- | :--- | :--- |
| COURSE: ENGINEERING PHYSICS | SEMESTER: 1 AND 2 <br> CREDITS: |
| COURSE CODE: 100906/PH900B <br> REGULATION: 2020 | COURSE TYPE: CORE |
| COURSE AREA/DOMAIN: Engineering Physics | CONTACT HOURS: <br> hours/Week |
| CORRESPONDING <br> CODE:100908/PH922S LAB COURSE | LAB COURSE <br> Engineering Physics Lab |

## Preamble:

The aim of the Engineering Physics Program is to offer students a solid background in the fundamentals of Physics and to impart that knowledge in engineering disciplines. The program is designed to develop scientific attitudes and enable the students to correlate the concepts of Physics with the core programmes.

## Prerequisite:

Higher secondary level Physics, Mathematical course on vector calculus, differential equations and linear algebra

## Course Contents and Lecture Schedule

| No | Topic | No. of Lectures |  |
| :--- | :--- | :--- | :--- |
| 1 | Oscillations and Waves (9 hours) |  |  |
| 1.1 | Harmonic oscillations, Damped harmonic motion-Derivation of <br> differential equation and its solution, Over damped, Critically damped <br> and Under damped Cases, Quality factor-Expression | 2 hrs |  |
| 1.2 | Forced oscillations-Differential Equation-Derivation of expressions <br> for amplitude and phase of forced oscillations, Amplitude Resonance- <br> Expression for Resonant frequency, Quality factor and Sharpness <br> ofResonance, Electrical analogy of mechanical oscillators | 3 hrs |  |
| 1.3 | Wave motion- Derivation of one-dimensional wave equation and <br> itssolution, Three dimensional wave equation and its solution (no <br> derivation) | 2 hrs |  |
| 1.4 | Distinction between transverse and longitudinal waves. <br> Transversevibration in a stretched string, Statement of laws of <br> vibration | 2 hrs |  |
| 2 | Wave Optics (9 hours) |  |  |

| 2.1 | Interference of light-Principle of superposition of waves, Theory of thinfilms - Cosine law (Reflected system), Derivation of the conditions of constructive and destructive Interference | 2 hrs |
| :---: | :---: | :---: |
| 2.2 | Interference due to wedge shaped films -Determination of thicknessand test for optical planeness, Newton's rings - Measurement of wavelength and refractive index, Antireflection coatings | 4 hr |
| 2.3 | Diffraction of light, Fresnel and Fraunhofer classes of diffraction, Diffraction grating-Grating equation | 2 hrs |
| 2.4 | Rayleigh criterion for limit of resolution, Resolving and Dispersivepower of a grating with expression (no derivation) | 1 hr |
| 3 | Quantum Mechanics \&Nanotechnology (9hours) |  |
| 3.1 | Introduction for the need of Quantum mechanics, Wave nature of Particles, Uncertainty principle, Applications-Absence electronsinside a nucleus and Natural line broadening mechanism | 2 hrs |
| 3.2 | Formulation of time dependent and independent Schrodinger wave equations-Physical Meaning of wave function, Particle in a one dimensional box- Derivation for normalised wave function and energyeigen values, Quantum Mechanical Tunnelling (Qualitative) | 4 hrs |
| 3.3 | Introduction to nanoscience and technology, Increase in surface to volume ratio for nanomaterials, Quantum confinement in one dimension, two dimension and three dimension-Nano sheets, Nanowires and Quantum dots | 2 hrs |
| 3.4 | Properties of nanomaterials-mechanical, electrical and opticalApplications of nanotechnology (qualitative ideas) | 1 hr |
| 4 | Magnetism \& Electro Magnetic Theory (9 hours) |  |
| 4.1 | Magnetic field and Magnetic flux density, Gauss's law for Magnetic flux density, Ampere's Circuital law, Faraday's law in terms of EMFproduced by changing magnetic flux | 2 hrs |
| 4.2 | Explanation for Magnetic permeability and susceptibility Classificationof magnetic materials- para, dia and ferromagnetic materials | 1 hr |
| 4.3 | Fundamentals of vector calculus, concept of divergence, gradient andcurl along with physical significance, Line, Surface and Volume integrals, Gauss divergence theorem \& Stokes' theorem | 2 hrs |
| 4.4 | Equation of continuity, Derivation of Maxwell's equations in vacuum, Comparison of displacement current with conduction current. Electromagnetic waves, Velocity of Electromagnetic waves in freespace, Flow of energy and Poynting's vector (no derivation) | 4 hrs |
| 5 | Superconductivity \& Photonics (9hours) |  |
| 5.1 | Super conducting Phenomena, Meissner effect and perfectdiamagnetism, Types of superconductors-Type I and Type II | 2 hrs |

| 5.2 | BCS Theory (Qualitative), High temperature <br> superconductors,Applications of super conductivity     | 2 hrs |
| :---: | :---: | :---: |
| 5.3 | Introduction to photonics-Photonic devices-Light Emitting Diode, Photodetectors -Junction and PIN photodiodes, Solar cells-I-V Characteristics | 2 hrs |
| 5.4 | -Principle of propagation of light, Types of fibres-Step index and ex fibres, Numerical aperture -Derivation, Fibre optic communication pck diagram), Industrial, Medical and Technological applications of , Fibre optic sensors-IntensityModulated and Phase modulated sensors | 3 hrs |
|  |  | $\begin{array}{cc} \hline \text { TOTAL } & \mathbf{4 5} \\ \text { hrs } \end{array}$ |

Course Outcomes: After the completion of the course the student will be able to

| CO 1 | Compute the quantitative aspects of waves and oscillations in engineering systems. |
| :--- | :--- |
| CO 2 | Apply the interaction of light with matter through interference, diffraction and identify these <br> phenomena in different natural optical processes and optical instruments. |
| CO 3 | Analyze the behaviour of matter in the atomic and subatomic level through the principles of <br> quantum mechanics to perceive the microscopic processes in electronic devices. |
| CO 4 | Classify the properties of magnetic materials and apply vector calculus to static magnetic <br> fields and use Maxwell's equations to diverse engineering problems |
| CO 5 | Analyze the principles behind various superconducting applications, explain the working of <br> solid state lighting devices and fibre optic communication system |

## Justification

| CO1.PO1 | Compute the quantitative aspects of waves and oscillations in engineering <br> systems like natural frequency, damped frequency, forced frequency, resonant <br> frequency, band-width, Q-factor, wavelength, wave-velocity, frequency etc. |
| :--- | :--- |
| CO1.PO2 | Review research literature to identify physics behind current and relevant <br> innovations in the respective branch by assignment |
| CO1.PO8 | Professional punctuality and understanding professional ethics by self-reading |
| CO1.PO9 | Effectively function individually and as a team in various class presentations |
| CO1.PO12 | Capture the current and relevant innovations in the respective branch |

| CO2.PO1 | Apply the interaction of light with matter through interference, diffraction and <br> identify these phenomena in different natural optical processes and optical <br> instruments. <br> E.g.: measurement of fringe width, refractive index, path difference, phase <br> difference, annihilation of reflection by interference, angle of diffraction, grating <br> element: its dispersive power and resolving power. |
| :--- | :--- |
| CO2.PO2 | Review research literature to identify physics behind current and relevant <br> innovations in the respective branch by assignment |
| CO2.PO8 | Professional punctuality and understanding professional ethics by self-reading |
| CO2.PO9 | Effectively function individually and as a team in various class presentations |
| CO2.PO12 | Capture the current and relevant innovations in the respective branch |

| CO3.PO1 | Analyze the behaviour of matter in the atomic and subatomic level through the <br> principles of quantum mechanics to perceive the microscopic processes in electronic <br> devices. <br> E.g.: Wave-function and it's physical significance, Excitons, Schrodinger equations <br> and application to particle in a one dimensional box, Energy Eigen values, <br> tunneling, Quantum confinement, properties of nanomaterials |
| :--- | :--- |
| CO3.PO2 | Review research literature to identify physics behind current and relevant <br> innovations in the respective branch by assignment |
| CO3.PO8 | Professional punctuality and understanding professional ethics by self-reading |
| CO3.PO9 | Effectively function individually and as a team in various class presentations |
| CO3.PO12 | Capture the current and relevant innovations in the respective branch |

| CO4.PO1 | Classify the properties of magnetic materials and apply vector calculus to static <br> magnetic fields and use Maxwell's equations to diverse engineering problems. <br> E.g.: Faraday's Laws, Para, dia, ferromagnetism, Physical significance of gradient <br> divergence and curl and its' applications, displacement current and propagation of <br> electromagnetic waves. |
| :--- | :--- |
| CO4.PO2 | Review research literature to identify physics behind current and relevant <br> innovations in the respective branch by assignment |
| CO4.PO8 | Professional punctuality and understanding professional ethics by self-reading |
| CO4.PO9 | Effectively function individually and as a team in various class presentations |
| CO4.PO12 | Capture the current and relevant innovations in the respective branch |

| CO5.PO1 | Analyze the principles behind various superconducting applications, explain the <br> working of solid state lighting devices and fibre optic communication system. <br> E.g.: Meissner effect, classification of superconducting materials, Qualitative idea <br> of BCS theory. Working of various photonic devices like LED, various Photo <br> detectors, Solar cell, Classification of Optical fibre cable based on refractive index, <br> significance of Numerical aperture, fiber optic communication system and fiber <br> optic sensors. |
| :--- | :--- |
| CO5.PO2 | Review research literature to identify physics behind current and relevant <br> innovations in the respective branch by assignment |
| CO5.PO8 | Professional punctuality and understanding professional ethics by self-reading |
| CO5.PO9 | Effectively function individually and as a team in various class presentations |
| CO5.PO12 | Capture the current and relevant innovations in the respective branch |

# ASSIGNMENT QUESTIONS A Step-by-Step Procedure for Entrepreneurial Education <br> (Development of educational contents as per Entrepreneurial Pedagogy) 

## Assignment 1

## Part 1: Outline of the Entrepreneurial Education Event

1. Choose a Theme: To Initiate Learners into an Entrepreneurial Event

- Refer to NCERT Syllabus and identify a suitable theme
- Choose an attractive title for the Learning Event
- Make sure the title is appropriate, short and impactful
- Capture the essence of entrepreneurial learning undertaken in the learning event.

2. Define Learning Outcomes: To Fine-tune the Learning Event with Global Learning Outcomes

- Specify the small piece of knowledge generated during Entrepreneurial Learning Event(ELE)
- Identify match with $21^{\text {st }}$ century skills, abilities, talents, values, attitudes, etc.
- Combine both parts into one sentence to define Learning Outcomes.
- Ensure that the learner is rendered future-ready with those learning outcomes.

3. Envision a Learning Relic: To Simulate Entrepreneurial Learning by Developing Products and Services

- Visualize a product or service of relevance to the family and nation based on the theme.
- Make sure that it is affordable and achievable to the poorest learner of the nation.
- Suggest an attractive brand name for the product/ service and identify a suitable career.
- Ensure that the contextual/regional efforts of the learner also contribute to the nation building.

## Part 2: Entrepreneurial Learning Event (ELE)

[A Learner-centered and Learner-driven Entrepreneurial Event as an Appetizer for Learning]

1. Creation stage: Learner initiates learning and creates and entrepreneurial seed idea [Motto: A seed idea is enough to make my life]

- Handhold learner to explore to identify a piece of exciting knowledge, unknown to them so far. Direct the learner to explore a seed idea for entrepreneurial venture.
- Make sure that learner make excellent use of their five sense organs and intuition (6th Sense) in the exploration
- Confirm that the seed idea is unique, such that the learner can claim its ownership.
- Facilitate learner to formulate his/her discovery in concrete and specific terms.

2. Celebration stage: Learner celebrates the seed idea and creatively communicates it
[Motto: A seed idea is enough to address the world squarely]

- Facilitate the celebration of the "Eureka Moment" of the learner
- Help them communicate their discovery to the world (family, school, community,
nation, and world).
- Make sure that the focus of celebration is the seed idea the learner has developed.
- Suggest ways for creative communication in tune with their unique multiple intelligences.

3. Challenge stage: Learner challenges oneself with the seed idea and perfects oneself.
[Motto: A seed idea is enough to improve my life]

- Identify the matching 21 st century skills, values and attitudes to the generated seed idea
- Define a benchmark for their development during the course of the day.
- Create an appropriate and a concrete exercise to develop the identified skill, value or attitude.
- State the achievement level of the particular skill, value and attitude.

4. Collaboration Stage: Learner gamifies the seed idea and playfully achieves synergy.
[Motto: A seed idea is enough to make a game]

- Facilitate the learner to develop a game based on the seed idea they have discovered.
- Assist them to play the game they have developed based on the seed idea.
- Motivate them to collaborate/compete with others to improve the seed idea they have discovered.
- Record the achievement levels and insights received during the game played with family or friends, etc.

5. Campaign Stage: Learner develops entrepreneurship and masters the art of service.
[Motto: A seed idea is enough to change the world]

- Encourage the learner to develop a product or service based on the seed idea discovered.
- Make sure that the developed products and services are useful toothers.
- Plan to develop products and services based on locally available resources.
- Develop a concept to map the products and services local flavors on to the political map of the nation or the globe.

## Part 3: Entrepreneurial Teaching Event (ETE)

[A Learner-centered, but Teacher- \& Media-driven Entrepreneurial Teaching as the Feast of Learning]
Teachers are experts, who shall complement the foundational learning event with foundational teaching event. Here, teachers are expected to integrate the knowledge already developed related to the small piece of knowledge the child has already mastered in the partl in two ways. Media shall complement the role of teachers, detailing currency and prognosis for the knowledge developed by the learner.

## 1. Vertical Integration

- Purpose: To teach the history of development of the seed idea
- Keep the seed idea developed by the learner as the fulcrum of integration.
- Elaborate how the seed idea was initiated and developed through the history of ideas.
- Project the possible future development of the seed idea and its outlook.
- At the end of the day the learners shall get feeling, he has learnt something great.

## 2. Horizontal Integration

- Purpose: To teach the diverse application of the seed idea in various fields
- Elaborate on the application of the seed idea in different areas of human activity.
- Elaborate on well-known current applications as reported in the news.
- Project the possible future development of the seed idea as a whole.

## Entrepreneurial Teaching Video

- Purpose: To develop a video describing the historical and interdisciplinary significance of seed idea
- Develop the script, based on which the video shall be developed
- Duration of video shall be $5-8$ minutes
- Develop the video using a software available to you.
- A 5-8 minute video describing the historical and interdisciplinary significance of seed idea

## Part 4: Review of the Entrepreneurial Education Event

1. Reviewl:

- Go back to the part 1 and recheck the appropriateness of definitions made there.
- Make sure that the entrepreneurial seed idea and entrepreneurial products are appropriately defined.
- Calibrate and fine-tune them if necessary.
- Go through the video developed in the Foundational Teaching Event and make appropriate editorial work.

2. Review2:

- Identify a learner of the age for whom the entrepreneurial home learning event is addressed.
- Take how the learner appreciates the learning-teaching event developed by you.
- Check the appropriateness of the language used for the narration of different steps of the learning-teaching event.
- Make appropriate modifications and finalize the entrepreneurial home learning event.

## Part 5: Finalization of the Entrepreneurial Education Event

## 1. Finalization of the Entrepreneurial Learning Event

- Remove the structural format used to develop the content for entrepreneurial learning event.
- Redraft it in a highly readable format and present it as a rich text with supportive diagrams and figures facilitating easy understanding of the text.
- Try to present it in a one-page document for quick and easy reading

2. Finalization of Entrepreneurial Teaching Event

- Review the video with an aesthetic perspective and make it appealing to the target audience of respective age groups.
- Make cosmetic corrections to the video and develop it as a unique video in terms of content and format.
- Make sure that the duration of the video is at least 5 minutes and that do not exceed 10 minutes in view of optimum performance in social media.

## Assignment 2

## Part - A

## Oscillations and waves

1. Compare electrical and mechanical oscillating systems? (2 marks)
2. A capacitor of capacity $1 \square \square$, an inductor of self-inductance 0.2 H and a resistor ofresistance $800 \Omega$ are in series. Analyze if the circuit is oscillatory or not? If yes, find the frequency of current oscillation produced by it? (4 marks)
3. Obtain the expression for the frequency and velocity of a wave travelling through a stretched string. (4 marks)

## Interference and Diffraction

4. With the help of a diagram, explain interference of light in thin film and derive expression for the path difference, condition for brightness and darkness. ( 6 marks)
5. A newton's ring arrangement is used with the source emitting two wavelengths $\lambda_{1}=6000 \AA$ and $\lambda_{2}=4500 \AA$ and it is found that the $\mathrm{n}^{\text {th }}$ dark ring due to $\lambda_{1}$ coincides with $(\mathrm{n}+1)^{\text {th }}$ ring due to $\lambda_{2}$. If the radius of curvature of the lens is 90 cm , find the diameter of the nth ring due to $\lambda_{1}$. (4 marks)

## Quantum mechanics and Nanotechnology

6. List the properties of an acceptable wave function. State Heisenberg's uncertainty principle. How does the uncertainty principle account for the absence of electrons in the nucleus. (6 marks)
7. A microscope, using photons, is employed to locate an electron in an atom within a distance of $0.2 \AA$. What is the uncertainty in the momentum of the electron located in this way? ( 4 marks)

## Magnetism and Electromagnetic Theory

8. Starting from Maxwell's equation, derive electromagnetic wave equations in free space (6 marks)
9. If the magnitude of $H$ in a plane wave is $1 \mathrm{~A} / \mathrm{m}$, find the magnitude of E in free space ( 4 marks)

## Superconductivity and Photonics

10. Show that superconductors are perfect diamagnets. Distinguish between Type I and Type II superconductors with suitable examples. ( 6 marks)
11. For a superconducting specimen, the values of critical fields are $1.4 \times 10^{5} \mathrm{~A} / \mathrm{m}$ and $4.2 \times 10^{5}$ $\mathrm{A} / \mathrm{m}$ for 14 K and 13 K respectively. Calculate the transition temperature and critical fields at 0 K and 4.2 K (4 marks)

## Part - B

Make as seed idea related to any topic from any module as done in the first part of assignment 1

## ENGINEERING MECHANICS

COURSE INFORMATION SHEET

| PROGRAMME:AD | DEGREE: BTECH |
| :--- | :--- |
| COURSE:ENGINEERING MECHANICS | SEMESTER: S2 <br> L-T-P-CREDITS: 2-1-0-3 |
| COURSE CODE: 100908/CE900C <br> REGULATION: 2020 | COURSE TYPE: BASIC |
| COURSE AREA/DOMAIN: <br> ENGINEERING SCIENCE | CONTACT HOURS: 3+1(tutorial) <br> hours/Week |
| CORRESPONDING LAB COURSE CODE <br> (IF ANY): NIL | LAB COURSE NAME: NIL |

SYLLABUS:

| MODULE | DETAILS | HOURS |
| :--- | :--- | :--- |
|  | Introduction to Engineering Mechanics - statics - basic principles of <br> statics - Parallelogram law, equilibrium law, principles of superposition <br> and transmissibility, law of action and reaction(review), free body <br> diagrams. <br> Concurrent coplanar forces - composition and resolution of forces - <br> resultant and equilibrium equations - methods of projections - methods <br> of moments - Varignon's Theorem of moments. | 7 |
|  | Friction - sliding friction - Coulomb's laws of friction - analysis of <br> single bodies - wedges, ladder analysis of connected bodies. |  |
| Parallel coplanar forces - couple - resultant of parallel forces - centre of <br> parallel forces - equilibrium of parallel forces - Simple beam subject to <br> concentrated vertical loads. General coplanar force system - resultant <br> and equilibrium equations. | 7 |  |
| III | Centroid of composite areas- - moment of inertia - parallel axis and <br> perpendicular axis theorems. <br> Polar moment of inertia,radius of gyration,mass moment of inertia - <br> ring,cylinder and disc. <br> Theorem of PappusGuldinus(demonstration only) <br> Forces in space - vectorial representation of forces, moments and couples <br> - resultant and equilibrium equations - concurrent forces in space <br> (simple problems only) | 7 |
|  | Dynamics - rectilinear translation -equations of kinematics(review) <br> Kinetics - equation of motion - D'Alembert's principle - motion on <br> horizontal and inclined surfaces, motion of connected bodies. Impulse <br> momentum equation and work energy equation (concepts only). <br> Curvilinear translation -equations of kinematics - projectile <br> motion(review), kinetics - equation of motion. Moment of momentum <br> and work energy equation (concepts only). | 7 |
| IV | Rotation - kinematics of rotation - equation of motion for a rigid body <br> rotating about a fixed axis - rotation under a constant moment. <br> Plane motion of rigid body - instantaneous centre of rotation (concept | 7 |

| MODULE | DETAILS | HOURS |
| :--- | :--- | :--- |
|  | only). <br> Simple harmonic motion - free vibration -degree of freedom - <br> undamped free vibration of spring <br> mass system - effect of damping(concept only) |  |
| TOTAL HOURS | 35 |  |

## COURSE PRE-REQUISITES:

| C.CODE | COURSE NAME | DESCRIPTION | SEMESTER |
| :--- | :--- | :--- | :--- |
|  | NIL |  |  |

## COURSE OBJECTIVES:

1 To expose the students to the fundamental concepts of mechanics and enhance their problem-solving skills.
2 It introduces students to the influence of applied force system and the geometrical properties of the rigid bodies while stationary or in motion.
3 After this course students will be able to recognize similar problems in real-world situations and respond accordingly.

## COURSE OUTCOMES:

After completion of the course the student will be able to:

| 二 2 | $\bigcirc$ | O | O | O | O | $\bigcirc$ | O | $\bigcirc$ | O2 | $\bigcirc$ | $\cdots$ | N | O | O | N |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | Recall principles and theorems related to rigid body mechanics |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | 2 | 2 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 2 | Identify and describe the components of system of forces acting on the rigid body |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | 3 | 3 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 3 | Apply the conditions of equilibrium to various practical problems involving different force system. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | 3 | 3 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 4 | Choose appropriate theorems, principles or formulae to solve problems of mechanics. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | 3 | 3 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 5 | Solve problems involving rigid bodies, applying the properties of distributed areas and masses |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | 3 | 3 |  |  |  |  |  |  |  |  |  |  |  |  |  |

## JUSTIFICATION FOR CO-PO MAPPING:

| CO | PO | MAPPING | JUSTIFICATION |
| :---: | :---: | :---: | :---: |
| CO1 | PO1 | 2 | Principles and theorems related to rigid body mechanics are applied to solve engineering problems |
|  | PO2 | 2 | Principles and theorems related to rigid body mechanics are usedto identify, formulate, and analyze complex engineering problems |
| CO 2 | PO1 | 3 | Components of system of forces acting on the rigid body are used to solve engineering problems |
|  | PO2 | 3 | Components of system of forces acting on the rigid bodyused to identify, formulate, and analyze complex engineering problems |
| CO3 | PO1 | 3 | Conditions of equilibrium are important in solving engineering problems |
|  | PO2 | 3 | Conditions of equilibriumusedtoformulate and analyze complex engineering problems |
| CO 4 | PO1 | 3 | Theorems, principles or formulae should be appropriately usedto solve engineering problems |
|  | PO2 | 3 | Theorems, principles or formulae should be appropriately usedtoformulate, review research literature, and analyze complex engineering problems |
| CO5 | PO1 | 3 | Knowledge in the properties of distributed areas and masses |

| CO | PO | MAPPING | JUSTIFICATION |
| :--- | :--- | :--- | :--- |
|  |  |  | is necessary to solve engineering problems |
|  | PO2 | 3 | Properties of distributed areas and masses is usedto identify, <br> formulate, and analyze complex engineering problems |

GAPS IN THE SYLLABUS - TO MEET INDUSTRY/PROFESSION REQUIREMENTS:

| Sl No | DESCRIPTION | PROPOSED <br> ACTIONS | RELEVANT <br> POs |
| :--- | :--- | :--- | :--- |
| 1 | Product of Inertia | NPTEL \& Additional |  |

TOPICS BEYOND SYLLABUS/ADVANCED TOPICS/DESIGN:

## COURSE PLAN

| HOUR | MODUL $\mathbf{E}$ | TOPICS PLANNED |
| :---: | :---: | :---: |
| HOUR 1 | Cll | Introduction to engineering mechanics - introduction on statics and dynamics - Basic principles of statics |
| HOUR 2 |  | Parallelogram law, equilibrium law - Superposition and transmissibility, law of action and reaction (review the topics) |
| HOUR 3 |  | Free body diagrams. Degree of freedom - types of supports and nature of reactions - exercises for free body diagram preparation |
| HOUR 4 |  | Composition and resolution of forces, resultant and equilibrium equations (review the topics) - numerical exercises for illustration. |
| HOUR 5 |  | numerical exercises for illustration |
| HOUR 6 |  | Concurrent coplanar forces - analysis of concurrent forces methods of projections - illustrative numerical exercise teacher assisted problem solving. |
| HOUR 7 |  | Analysis of concurrent forces - methods of moment Varignon's Theorem of Moments - illustrative numerical exercise- teacher assisted problem solving. |
| HOUR 8 |  | Analysis of concurrent force systems - extended problem solving - Session I. |
| HOUR 9 |  | Analysis of concurrent force systems - extended problem solving - Session II - learning review quiz. |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 10 \\ \hline \end{array}$ |  | Analysis of concurrent force systems - extended problem solving - Session III. |
| $\begin{array}{\|l} \hline \text { HOUR } \\ \hline 11 \\ \hline \end{array}$ |  | Analysis of concurrent force systems - extended problem solving - Session IV. |
| $\begin{aligned} & \text { HOUR } \\ & 12 \\ & \hline \end{aligned}$ | 2 | Friction - sliding friction - Coulomb's laws of friction - analysis of single bodies |
| $\begin{array}{\|l} \text { HOUR } \\ 13 \end{array}$ |  | Illustrative examples on wedges and ladder-teacher assisted problem solving tutorials using problems from wedges and ladder. |
| $\begin{aligned} & \text { HOUR } \\ & 14 \\ & \hline \end{aligned}$ |  | Problems on friction - analysis of connected bodies. Illustrativenumerical exercise- teacher assisted problem solving. |
| $\begin{aligned} & \text { HOUR } \\ & 15 \\ & \hline \end{aligned}$ |  | Problems on friction - extended problem solving |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 16 \\ \hline \end{array}$ |  | Parallel coplanar forces - couple - resultant of parallel forces centre of parallel forces |
| $\begin{array}{\|l\|} \hline \text { HOUR } \\ \hline 17 \\ \hline \end{array}$ |  | Equilibrium of parallel forces - Simple beam subject to concentrated vertical loads. |
| $\begin{array}{\|l} \text { HOUR } \\ 18 \end{array}$ |  | General coplanar force system - resultant and equilibrium equations - illustrative examples - teacher assisted problem solving. |
| $\begin{aligned} & \text { HOUR } \\ & 19 \end{aligned}$ |  | General coplanar force system - resultant and equilibrium equations - illustrative example |

| HOUR | MODUL <br> E | TOPICS PLANNED |
| :---: | :---: | :---: |
| $\begin{aligned} & \hline \text { HOUR } \\ & 20 \end{aligned}$ |  | General coplanar force system - Extended problem solving Quiz to evaluate learning level. |
| $\begin{aligned} & \hline \text { HOUR } \\ & 21 \\ & \hline \end{aligned}$ | 3 | Centroid of simple and regular geometrical shapes - centroid of figures in combination - |
| $\begin{aligned} & \text { HOUR } \\ & 22 \end{aligned}$ |  | composite areas - examples for illustration |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 23 \\ \hline \end{array}$ |  | Moment of inertia - parallel axis theorem -examples for illustration - problems for practice |
| $\begin{aligned} & \text { HOUR } \\ & 24 \end{aligned}$ |  | Moment of inertia - perpendicular axis theorem - example for illustration to be given as hand out and discussion on the solved example. |
| $\begin{aligned} & \text { HOUR } \\ & 25 \end{aligned}$ |  | Moment of inertia - perpendicular axis theorem - example for illustration to be given as hand out and discussion on the solved example. |
| $\begin{aligned} & \hline \text { HOUR } \\ & 26 \\ & \hline \end{aligned}$ |  | Solutions to practice problems - problems related to centroid and moment of inertia - problems for practice |
| $\begin{aligned} & \text { HOUR } \\ & 27 \end{aligned}$ |  | Polar moment of inertia, Radius of gyration. Mass moment of inertia of ring, cylinder and uniform disc. Theorem of PappusGuldinus- Demonstration |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 28 \\ \hline \end{array}$ |  | Theorem of Pappus Guldinus - Demonstration |
| $\begin{aligned} & \text { HOUR } \\ & 29 \end{aligned}$ |  | Introduction to forces in space - vectorial representation of forces, moments and couples - simple problems to illustrate vector representations of forces, moments and couples to be done in class. |
| $\begin{array}{\|l} \text { HOUR } \\ 30 \end{array}$ |  | Solution to practice problems - resultant and equilibrium equations for concurrent forces in space - concurrent forces in space |
| $\begin{aligned} & \hline \text { HOUR } \\ & 31 \end{aligned}$ |  | 2 simple problems to illustrate the application of resultant and equilibrium equations for concurrent forces in space. |
| $\begin{aligned} & \text { HOUR } \\ & 32 \end{aligned}$ | 4 | Introduction to dynamics - review of rectilinear translation equations of kinematics - problems to review the concepts additional problems involving extended application as exercises. |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 33 \\ \hline \end{array}$ |  | Solutions to exercises with necessary explanation |
| $\begin{aligned} & \hline \text { HOUR } \\ & 34 \\ & \hline \end{aligned}$ |  | Solutions to exercises with necessary explanation given as hand out - introduction to kinetics - equation of motion |
| $\begin{array}{\|l} \text { HOUR } \\ 35 \end{array}$ |  | D'Alembert's principle - illustration of the concepts using one numerical exercise from motion on horizontal and inclined surfaces |
| $\begin{aligned} & \text { HOUR } \\ & 36 \end{aligned}$ |  | Motion of connected bodies - example for illustration to be given as hand out and discussion on the solved example problems for practice to be done by self. . |
| HOUR |  | Motion of connected bodies-extended problem |

| HOUR | MODUL <br> E | TOPICS PLANNED |
| :---: | :---: | :---: |
| 37 |  | solving.Curvilinear translation - Review of kinematics projectile motion - simple problems to review the concepts |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 38 \\ \hline \end{array}$ |  | Introduction to kinetics - equation of motion - illustration of the concepts using numerical exercises. |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 39 \\ \hline \end{array}$ |  | Extended problem solving - rectilinear and curvilinear translation. |
| $\begin{aligned} & \text { HOUR } \\ & 40 \end{aligned}$ |  | Concepts on Impulse momentum equation and work energy equation (rectilinear translation - discussions to bring out difference between elastic and inelastic collusions). |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 41 \\ \hline \end{array}$ |  | Concepts on Moment of momentum and work energy equation (curvilinear translation) |
| $\begin{aligned} & \text { HOUR } \\ & 42 \end{aligned}$ | 5 | Rotation - kinematics of rotation - equation of motion for a rigid body rotating about a fixed axis - simple problems for illustration. |
| $\begin{aligned} & \hline \text { HOUR } \\ & 43 \end{aligned}$ |  | Rotation under a constant moment - teacher assisted problem solving. |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 44 \end{array}$ |  | Rotation under a constant moment - extended problem solving. |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 45 \\ \hline \end{array}$ |  | Rotation under a constant moment - extended problem solving. |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 46 \\ \hline \end{array}$ |  | Plane motion of rigid body - instantaneous centre of rotation (concept only). |
| $\begin{array}{\|l} \hline \text { HOUR } \\ 47 \\ \hline \end{array}$ |  | Introduction to harmonic oscillation -free vibrations - simple harmonic motion - differential equation and solution. |
| $\begin{aligned} & \text { HOUR } \\ & 48 \end{aligned}$ |  | Degree of freedom - examples of single degree of freedom (SDOF) systems - Idealisation of mechanical systems as springmass systems (concept only). |
| $\begin{aligned} & \hline \text { HOUR } \\ & 49 \end{aligned}$ |  | SDOF spring mass system - equation of motion - undamped free vibration response - concept of natural frequency. |
| $\begin{aligned} & \hline \text { HOUR } \\ & 50 \end{aligned}$ |  | Free vibration response due to initial conditions. |
| $\begin{aligned} & \hline \text { HOUR } \\ & 51 \\ & \hline \end{aligned}$ |  | Simple problems on determination of natural frequency and free vibration response to test the understanding level. |
| $\begin{aligned} & \text { HOUR } \\ & 52 \end{aligned}$ |  | Free vibration analysis of SDOF spring-mass systems - Problem solving. Effect of damping on free vibration response (concept only). |

1. A ball of weight 120 N rests in a rightangled groove as shown in Figure. If all the surfaces are smooth, determine the reactions at all points of contact. (Co2, Co3)

L3
2. An electric-light fixture of weight $\mathrm{Q}=178 \mathrm{~N}$ is supported as shown in Figure. Determine the tensile forces S 1 and S 2 in the wires BA and BC if their angles of inclination are as shown.(Co1, Co2, Co3)

L3
3. What member forces does the vertical load $\mathrm{P}=100 \mathrm{~N}$ induce in the members of the system shown in Figure if angle $\alpha=40$ degrees. Neglect the weights of the members themselves and assume an ideal hinge at A and a perfectly flexible string BC . Is the member AB subjected to tension (pull) or compression (push)?(Co2, Co3)

L3
4. In Figure, weights P and Q are suspended in a vertical plane by strings $1,2,3$, arranged as shown. Find the tension induced in each string if $\mathrm{P}=2225 \mathrm{~N}$ and $\mathrm{Q}=4450 \mathrm{~N} .(\mathrm{Co} 2, \mathrm{Co} 3)$

L4
5. Two cylinders of weights $Q$ and $R$ are interconnected by a bar of negligible weight hinged to each cylinder at its geometric center by ideal pins. Determine the magnitude of P applied at the center of cylinder R to keep the cylinders in equilibrium in the position shown in Fig. 4. The following numerical data are given: $\mathrm{Q}=2000 \mathrm{~N}$ and $\mathrm{R}=1000 \mathrm{~N} .(\mathrm{Co} 2, \mathrm{Co} 3)$

L4
6. Two cylinders A and B rest as shown in Fig. 2. Cylinder A has a diameter of 10 cm and weight 15 N . Cylinder B has a diameter of 18 cm and weight 45 N . Determine the reactions at all the points of contact. (Hint: Use congruency of triangles AOP and POB to find distance PB)(Co2, Co3)

## ASSIGNMENT - 2

## Module 2

1. Find the reactions at supports of a simply supported beam shown in Fig. 3 (CO2, CO3)

Fig. 3
2. A horizontal prismatic bar $A B$, of negligible weight and length $4 m$, is hinged to a vertical wall at $A$ and supported at B by a tie rod BC that makes the angle 30 degrees with the horizontal. A weight $\mathrm{P}=100$ Nis at a distance of $x=1 \mathrm{~m}$ from A. Determine the tensile force in the tie bar BC.(CO1, CO2, CO3)

L3
3. A uniform ladder AB of length $\mathrm{l}=20 \mathrm{~m}$ and weight W is supported by the horizontal floor at A and by a vertical wall at B . It makes an angle $45^{\circ}$ with horizontal. If a man, whose weight is one-half that of the ladder, ascends the ladder, how much length x of the ladder he shall climb before the ladder slips. If a boy now stands on the end A of the ladder, what must be his least weight w so that the man may go on the top of the ladder? Assume coefficient of friction between the ladder and the wall as $1 / 3$ and that between the ladder and floor as $1 / 2 .(\mathrm{CO} 2, \mathrm{CO} 3)$
4. Two rectangular blocks of weight $\mathrm{W} 1=150 \mathrm{~N}$ and $\mathrm{W} 2=100 \mathrm{~N}$ are connected by a string and rest on an inclined on a horizontal surface. The coefficient of friction for all contact surfaces is $\mu=0.2$.

Find the magnitude and direction of the least force $P$ at which the motion of the blocks will impend.(CO2, CO3)

5. A block of mass 2000 kg is to be raised upwards by simultaneously pushing two identical wedges B and C under it. Each wedge weighs 200 N and the wedge angle is $15^{\circ}$. If the coefficient of friction at all surfaces in contact is 0.3 , find the minimum value of forces P required for doing the job.(CO2, CO3)

## ASSIGNMENT 3

1. Find the centroid of any shape using experiment and verify with calculations.
2. Find the centroid of the figure below.

Ans. $0.925 \mathrm{R}, 0.925 \mathrm{R}$
3. Find the moment of inertia about the axis DE and AB .

4. Find the centroidal moment of inertia

## TUTORIAL QUESTIONS

## MODULE I

7. Concurrent forces of $1,3,5,7,9$ and 11 N are applied at the centre of regular hexagon acting towards its vertices as shown in Figure 1.1. Determine the magnitude and direction of the resultant.

Figure 1.1

Figure 1.2
8. Determine the magnitude and direction of the resultant of the forces acting on the ring as shown in Figure 1.2
9. A ball of weight 120 N rests in a right angled groove as shown in Figure 1.3. If all the surfaces are smooth, determine the reactions at all points of contact.

Figure 1.3

Figure 1.4
10. Two smooth circular cylinders each of weight 100 N and radius 15 cm are connected at their centres by a string AB of length 40 cm and rest upon a horizontal plane as shown in Figure 1.4. The cylinder above them has a weight of 200 N and a radius of 15 cm . Find the force in the string AB and the reactions at points D and E .
11. Block $\mathrm{P}=5 \mathrm{~kg}$ and block Q of mass " m " kg are suspended through a cord which is in equilibrium as shown in Figure 1.5. Determine the mass of block Q.

Figure 1.5
12. An electric-light fixture of weight $\mathrm{Q}=178 \mathrm{~N}$ is supported as shown in Figure 1.6. Determine the tensile forces S 1 and S 2 in the wires BA and BC if their angles of inclination are as shown.

Figure 1.6

Figure 1.7
13. A ball of weight $\mathrm{Q}=53.4 \mathrm{~N}$ rests in a right-angled trough as shown in Figure 1.7. Determine the forces exerted on the sides of the trough at D and E if all surfaces are perfectly smooth.
14. A ball rests in a trough as shown in Figure 1.8 Determine the angle of tilt $\theta$ with the horizontal so that the reactive force at B will be one-third at A if all surfaces are perfectly smooth.

Figure 1.8

Figure 1.9
15. What axial forces does the vertical load $P$ induce in the members of the system shown in Figure 1.9. Neglect the weights of the members themselves and assume an ideal hinge at A and a perfectly flexible string BC.
16. A right circular roller of weight W rests on a smooth horizontal plane and is held in position by an inclined bar AC as shown in Figure 1.10. Find the tension S in the bar AC and the vertical reaction Rb at B if there is also a horizontal force P acting at.

Figure 1.10

Figure 1.11
17. A pulley A is supported by two bars $A B$ and $A C$ which are hinged at points $B$ and $C$ to a vertical mast EF (Figure 1.11). Over the pulley hangs a flexible cable DG which is fastened to the mast at D and carries at the other end G a load $\mathrm{Q}=20 \mathrm{kN}$. Neglecting friction in the pulley, determine the forces produced in the bars AB and AC . The angles between the various members are shown in the figure.
18. Two smooth circular cylinders, each of weight $\mathrm{W}=445 \mathrm{~N}$ and radius $\mathrm{r}=152 \mathrm{~mm}$, are connected at their centers by a string AB of length $1=406 \mathrm{~mm}$ and rest upon a horizontal plane, supporting above them a third cylinder of weight $\mathrm{Q}=890 \mathrm{~N}$ and radius $\mathrm{r}=152 \mathrm{~mm}$ (Figure 1.12). Find the forces S in the string and the pressures produced on the floor at the points of contact D and E

Figure 1.12

Figure 1.13
19. A weight Q is suspended from a small ring C , supported by two cords AC and BC (Figure 1.13) The cord AC is fastened at A while the cord BC passes over a frictionless pulley at B and carries the weight P as shown. If $\mathrm{P}=\mathrm{Q}$ and $\alpha=500$, find the value of the angle $\beta$.
20. A force $P$ is applied at point $C$ as shown in (Figure 1.14). Determine the value of angle $\alpha$ for which the larger of the string tension is as small as possible and the corresponding values of tension in the strings 1 and 2.

Figure 1.14

Figure 1.15
21. Using the method of projections, find the magnitude and direction of the resultant R of the four concurrent forces shown in Figure 1.15 and having the magnitudes F1 $=1500$ N, F2 $=2000$ N, F3 $=3500 \mathrm{~N}$ and F4 $=1000 \mathrm{~N}$.
22. Forces of 2, 3, 4, 5 and 6 kN are acting at one of the angular points of a regular hexagon towards the other angular points taken in order. Find the resultant of the system of forces.
23. In Figure 1.16, weights P and Q are suspended in a vertical plane by strings 1, 2, 3, arranged as shown. Find the tension induced in each string if $\mathrm{P}=2225 \mathrm{~N}$ and $\mathrm{Q}=4450 \mathrm{~N}$.

Figure 1.16

Figure 1.17
24. Two vertical masts AB and CD are guyed by the wires BF and DG , in the same vertical plane and connected by a cable BD of length 1 , from the middle point E of which is suspended a load Q (Figure 1.17). Find the tensile force $S$ in each of the two guy wires $B F$ and $B G$ if the load $Q=445$ N and the length $\mathrm{l}=6.1 \mathrm{~m}$ and $\mathrm{sag} \mathrm{d}=0.305 \mathrm{~m}$.
25. A ball of weight W rests upon a smooth horizontal plane and has attached to its centre two strings AB and AC which pass over frictionless pulleys at B and C and carry loads P and Q , respectively, as shown in Figure 1.18. If the string AB is horizontal, find the angle $\alpha$ that is string AC makes with horizontal when the ball is in a position of equilibrium. Also find the pressure R between the ball and the plane.

Figure 1.18

Figure 1.19
26. Two cylinders of weights $Q$ and $R$ are interconnected by a bar of negligible weight hinged to each cylinder at its geometric center by ideal pins. Determine the magnitude of P applied at the center of cylinder R to keep the cylinders in equilibrium in the position shown in Figure 1.19. The following numerical data are given: $\mathrm{Q}=2000 \mathrm{~N}$ and $\mathrm{R}=1000 \mathrm{~N}$.
27. Determine the magnitude of a horizontal force $P$ applied at the centre $C$ of a roller of weight $Q$ $=4450 \mathrm{~N}$ and radius $\mathrm{r}=380 \mathrm{~mm}$ which will be necessary to pull it over a 76 mm curb. Also find
what is the magnitude and the direction of the least force P min applied at C that will lift the roller over the curb in Figure 1.20.

Figure 1.20

## MODULE II

1. A system of parallel forces is acting on a rigid bar as shown in Figure 2.1. Reduce this system into
a) a single force
b) a force and a couple at A.

Figure 2.1

Figure 2.2
2. A 5 m bar of negligible weight rests in a horizontal position on the smooth planes as shown in Figure 2.2. Determine the load P and the reactions at supports.
3. A beam ABCD as shown in Figure 2.3 is simply supported on a hinged support at A and on a roller support at D inclined at 450 with the vertical. Determine the horizontal and vertical components of reaction at support A . Also find the direction and magnitude of the resultant at A .

Figure 2.3
4. A block of weight $\mathrm{W} 1=900 \mathrm{~N}$ rests on the horizontal surface and supports on top of it another block of weight $\mathrm{W} 2=225 \mathrm{~N}$. The block W 2 is attached to a vertical wall by an inclined string AB . Find the magnitude of the horizontal force P applied to the lower block that will be necessary for the slipping to impend as shown in Figure 2.4. The coefficient of friction for all contact surfaces is 0.3.

Figure 2.4
5. A uniform ladder of 4 m length rests against a wall at an angle of $45^{\circ}$ with the vertical. The coefficient of friction between the ladder and the wall is 0.4 and that between the ladder and the floor is 0.5 . If a man whose weight is one half of that of ladder ascends it, how high will he be when the ladder slips.
6. Two identical blocks A and B of weight W are supported by a rigid bar inclined at $45^{\circ}$ with the horizontal as shown in Figure 2.5. If both the blocks are in limiting equilibrium, find the coefficient of friction between the block and the wall assuming it to be the same.

Figure 2.5

Figure 2.6
7. A block weighing 10 kN is to be raised against a surface which is inclined at $60^{\circ}$ with the horizontal by means of $15^{\circ}$ wedge as shown in Figure 2.6. Find the horizontal force ( P ) which will just start the block to move, if the coefficient of friction between all the surfaces of contact be 0.2.
8. A system of coplanar parallel forces acting on a rigid bar as shown in Figure 2.7. Reduce this force system to (a) a single force, (b) a single force and a couple at A and (c) a single force and a couple at B.

Figure 2.7

Figure 2.8
9. The beam AB in Figure 2.8 is hinged at A and supported at B by a vertical cord which passes over a frictionless pulley at C and carries at its end a load P as shown. Determine the distance x from A at which a load Q must be placed on the beam if it is to remain in equilibrium in a horizontal position. Neglect the weight of the beam.
10. A boat is suspended on two identical davits like $A B C$ which is pivoted at $A$ and supported by a guide at B (Figure 2.9). Determine the reactions RA and RB at the points of support A and B if the vertical load transmitted to each davit at C is 4272 N . Friction in the guide at B should be neglected.

Figure 2.9

Figure 2.10
11. A man with weight 667.5 N stands on the middle rung of a 227.5 N ladder, as shown in Figure 2.10. Assuming the end $B$ rests on the corner of a wall and a stop at $A$ to prevent slipping, find the reactions at A and B .
12. A horizontal prismatic bar AB , of negligible weight and length 1 , is hinged to a vertical wall at $A$ and supported at B by a tie rod BC that makes the angle $\alpha$ with the horizontal (Figure 2.11). A weight $P$ can have any position along the bar as defined by the distance $x$ from the wall. Determine the tensile force $S$ in the tie bar.

Figure 2.11

Figure 2.12
13. A weightless bar $A B$ is supported in a vertical plane by a hinge at A and a tie bar DC , as shown in Figure 2.12. Determine the axial force S induced in the tie bar by the action of a vertical load P applied at B.
14. A bar AB hinged to the foundation at A and supported by a strut CD is subjected to a horizontal 50 kN load at B , as shown in Figure 2.13. Find the tensile force S in the strut and the reaction $\mathrm{R}_{\mathrm{A}}$.

Figure 2.13

Figure 2.14
15. A pair of adjustable players is used for turning a piece of 19 mm pipe as shown in Figure 2.14. For the dimensions shown, what compressive forces Q are applied to the sides of the pipe when the hand grip is represented by applied collinear forces P ?
16. Two blocks connected by a link AB are supported on two rough planes as shown in Figure 2.15. The coefficient of friction for block A on the horizontal plane is $\mu=0.4$. The angle of friction for block A on the plane is $\emptyset=15^{\circ}$. What is the smallest weight W of block A for which equilibrium of the system can exist?

Figure 2.15
Figure 2.16
17. Referring to the Figure 2.16, the coefficients of friction are as follows: 0.25 at the floor, 0.30 at the wall, and 0.20 between blocks. Find the minimum value for a horizontal force P applied to the lower block that will hold the system in equilibrium.
18. Two rectangular blocks of weight $\mathrm{W} 1=150 \mathrm{~N}$ and $\mathrm{W} 2=100 \mathrm{~N}$ are connected by a string and rest on an inclined on a horizontal surface as shown in Figure 2.17. The coefficient of friction for all contiguous surfaces is $\mu=0.2$. Find the magnitude and direction of the least force $P$ at which the motion of the blocks will impend.

Figure 2.17
19. A uniform ladder AB of length $\mathrm{l}=20 \mathrm{~m}$ and weight W is supported by the horizontal floor at A and by a vertical wall at B . It makes an angle $45^{\circ}$ with horizontal. If a man, whose weight is one-half that of the ladder, ascends the ladder, how much length x of the ladder he shall climb before the ladder slips. If a boy now stands on the end A of the ladder, what must be his least weight w so that the man may go on the top of the ladder? Assume coefficient of friction between the ladder and the wall as $1 / 3$ and that between the ladder and floor as $1 / 2$. (Figure 2.18)

Figure 2.18

Figure 2.19
20. A block shown in Figure 2.19 weighing 1000 N is resting on a rough horizontal plane. The plane is gradually lifted to increase the angle $\theta$. Determine whether sliding of block or overturning about A will occur first and the angle at which it occurs. Assume $\mu=0.3$.
21.

## MODULE III

1. Locate the centroid of the of a plane uniform lamina shown in Figure 3.1.

Figure 3.1

Figure 3.2
2. Locate the centroid of the T section shown in Figure 3.2.
3. Determine the coordinates of the centroid of the circular hole having 100 mm diameter to be cut in thin plate so that this point will be the centroid of the remaining shaded as shown in Figure 3.3

Figure 3.3

All dimensions in mm
Figure 3.4
4. Determine the moment of inertia of the unshaded composite area with respect to its centroidal axes as shown in Figure 3.4.
5. Determine the moment of inertia of the shaded area with respect to both axes shown in Figure 3.5.

Figure 3.5
6. Locate the centroid of the shaded area shown in Figure 3.6

Figure 3.6

Figure 3.7
7. Referring to the Figure 3.7, locate the centroid of length of the mean centre line of the stirrup with the dimensions shown
8. Locate the centroid $C$ of the shaded area obtained by cutting a semicircle of diameter ' $a$ ' from the quadrant of a circle of radius ' $a$ ' as shown in the Figure 3.8

Figure 3.8

Figure 3.9
9. Locate the centroid of the shaded area OADB shown in Figure 3.9.
10. An isosceles triangle ADE is to be cut from a square ABCD of dimension a as shown in Figure 3.10. Find the altitude $y$ of this triangle so that its vertex E will be the centroid of the remaining shaded area.

Figure 3.10

Figure 3.11
11. Locate the centre of gravity of the plane truss shown in Figure 3.11, if all the bars have the same weight per unit length.
12. A plane lamina ABCD is hung freely from point D . Find the angle made by DB with the vertical. (Figure 3.12)

Figure 3.12

Figure 3.13
13. Determine the moment of inertia of the shaded area with respect to the centroidal axis parallel and perpendicular to the side AB as shown in Figure 3.13
14. Determine the moments of inertia of the cross section of an iron beam with respect to the centroidal axes parallel and perpendicular to the axis AB as shown in Figure 3.14.

Figure 3.14

Figure 3.15
15. Determine the moment of inertia of the shaded area with respect to the centroidal axes parallel to AB as shown in Figure 3.15.

## MODULE IV

1. An elevator has an upward acceleration of $1 \mathrm{~m} / \mathrm{s}^{2}$, what pressure will be transmitted to the floor of the elevator by a man weighing 600 N travelling in the elevator? What pressure will be transmitted if the elevator has a downward acceleration of $2 \mathrm{~m} / \mathrm{s}^{2}$ ? Also find the upward acceleration of the elevator which could cause the man to exert a pressure of 1200 N on the floor
2. A lift carries a weight of 100 N and is moving with a uniform acceleration of $2.45 \mathrm{~m} / \mathrm{s}^{2}$. Determine the tension in this cables supporting the lift, when
a. Lift is moving upward
b. Lift is moving downward
3. A lift has an upward acceleration of $1.225 \mathrm{~m} / \mathrm{s}^{2}$
a. What force will a man weighing 500 N exert on the floor of the lift?
b. What force would he exert if the lift had an acceleration of $1.225 \mathrm{~m} / \mathrm{s}^{2}$ downwards?
c. What upward acceleration would cause his weight to exert a force of 600 N on the floor?
4. An elevator of weight 5 kN starts from rest and moves upward with constant acceleration, travelling a distance of 10 m is 5 s . Find the tensile force in the cable during this accelerated motion. Neglect friction.
5. An elevator weighs 2500 N and is moving vertically downwards with a constant acceleration. Write the equation for the elevator cable tension. Starting from rest it travels a distance of 25 m during an interval of 15 seconds. Find the cable tension during this time. Neglect all other resistance to motion.
6. An elevator weighing 5000 N is ascending with an acceleration of $3 \mathrm{~m} / \mathrm{s}^{2}$. During this ascend, its operator whose weight is 700 N is standing on the weighing pan placed on the floor. What is the weighing pan reading? What will be the total tension in the cables of elevator during this motion?

## MODULE V

1. A helical spring with negligible mass extends 0.3 mm under a mass of 1.5 kg and is made to support a mass of 50 kg . The spring and the mass system is displaced vertically through 13 mm and released. Determine the frequency of natural vibration of system. Find also the velocity of the mass, when it is 6 mm below its rest position.
2. Find the natural frequency of the system shown in Figure 5.1 below with $\mathrm{k} 1=2000 \mathrm{~N} / \mathrm{m}, \mathrm{k} 2=$ $2500 \mathrm{~N} / \mathrm{m}, \mathrm{k} 3=3000 \mathrm{~N} / \mathrm{m}, \mathrm{m}=5 \mathrm{~kg}$

Figure 5.1
3. Find the natural frequency of the system shown in Figure 5.2 . Here $\mathrm{k}=5 \times 10^{3} \mathrm{~N} / \mathrm{m}, \mathrm{m}=40 \mathrm{~kg}$

Figure 5.2

## BASICS OF ELECTRICAL \&ELECTRONICS ENGINEERING

## COURSE INFORMATION SHEET

| PROGRAMME: AEI/AI\&DS/EE//EC/AD | DEGREE: BTECH |
| :--- | :--- |
| COURSE: Basics of Electrical Engineering | SEMESTER:2 rREDITS:3 |
| COURSECODE:100908/CO900F <br> REGULATION: 2020UG | COURSE TYPE:CORE |
| COURSE AREA/DOMAIN: | CONTACT HOURS: 2+1 (Lecture hours/Week.) |
| CORRESPONDING LAB COURSE CODE (IF <br> ANY):Yes | LAB COURSE NAME: Electrical Workshop |

## SYLLABUS:

| UNIT | DETAILS | HOURS |
| :---: | :---: | :---: |
| I | MODULE 1: Elementary Concepts of Electric Circuits Elementary concepts of DC electric circuits: Basic Terminology including voltage, current, power, resistance, emf; Resistances in series and parallel; Current and Voltage Division Rules; Capacitors \& Inductors: V-I relations and energy stored. Ohms Law and Kirchhoff's laws-Problems; Star-delta conversion (resistive networks onlyderivation not required)- problems. Analysis of DC electric circuits: Mesh current method - Matrix representation - Solution of network equations. Node voltage methods-matrix representation-solution of network equations by matrix methods. Numerical problems. | 8 |
| II | MODULE 2: Elementary Concepts of Magnetic circuits, Electromagnetic Induction and AC fundamentals Magnetic Circuits: Basic Terminology: MMF, field strength, flux density, reluctance - comparison between electric and magnetic circuits- Series and parallel magnetic circuits with composite materials, numerical problems. Electromagnetic Induction: Faraday's laws, problems, Lenz's law- statically induced and dynamically induced emfs - Selfinductance and mutual inductance, coefficient of coupling Alternating Current fundamentals: Generation of alternating voltages-Representation of sinusoidal waveforms: frequency, period, Average, RMS values and form factor of waveforms-Numerical Problems. |  |
| III | MODULE 3: AC Circuits AC Circuits: Phasor representation of sinusoidal quantities. Trignometric, Rectangular, Polar and complex forms. Analysis of simple AC circuits: Purely resistive, inductive \& capacitive circuits; Inductive and capacitive reactance, concept of impedance. Average Power Power factor. Analysis of RL, RC and RLC series circuits-active, reactive and apparent power. Simple numerical problems. Three phase AC systems: Generation of three phase voltages; advantages of three phase systems, star and delta connections (balanced only), relation between line and phase voltages, line and phase currentsNumerical problems | 8 <br>  <br>  <br> 8 |
| TOTAL HOURS |  | 24 |

## COURSE PRE-REQUISITES:

| C.CODE | COURSE NAME | DESCRIP <br> TION | SEM |
| :---: | :--- | :--- | :--- |
|  | $11^{\mathrm{II}}$ and $12^{\mathrm{III}} \quad$ Standard <br> Physics and <br> Mathematics | A thorough knowledge of $11^{\mathrm{II}}$ and $12^{\mathrm{II} \mathrm{\prime}}$ <br> standard <br> Physics and Mathematics |  |

## COURSE OBJECTIVES:

1 To equip students of all branches of Engineering with an understanding of the fundamental principles of Electrical Engineering
2 To prepare students for learning advanced topics in Electrical Engineering

## COURSE OUTCOMES:

| Sl. <br> No. | DESCRIPTION | BLOOMS' <br> TAXONOMY LEVEL |
| :--- | :--- | :--- |
| 1 | Students will be able to apply fundamental concepts and circuit <br> laws to solve simple DC electric and magnetic circuits | Application[Level 3] |
| 2 | Students will be able to develop and solve models of magnetic <br> circuits | Comprehension [Level 2] |
| 3 | Students will be able to apply the fundamental laws of electrical <br> engineering to solve simple ac circuits in steady state | Application [Level 3] |

MAPPING COURSE OUTCOMES (COs) - PROGRAM OUTCOMES (POs) AND COURSE OUTCOMES (COs) - PROGRAM SPECIFIC OUTCOMES (PSOs):

|  | $\begin{aligned} & \mathrm{PO} \\ & \mathbf{1} \\ & \hline \end{aligned}$ | $\begin{array}{\|l\|} \hline \mathbf{P O} \\ 2 \end{array}$ | $\begin{array}{\|l\|} \hline \mathbf{P O} \\ \mathbf{3} \end{array}$ | $\begin{aligned} & \mathrm{PO} \\ & 4 \end{aligned}$ | $\begin{array}{\|l\|} \hline \mathbf{P O} \\ \hline \end{array}$ | $\begin{aligned} & \mathrm{PO} \\ & 6 \end{aligned}$ | $\begin{array}{\|l\|l\|} \hline \mathbf{P O} \\ \hline \end{array}$ | $\begin{aligned} & \mathrm{PO} \\ & \mathbf{8} \end{aligned}$ | $\begin{array}{\|l\|} \hline \mathbf{P O} \\ \mathbf{9} \end{array}$ | $\begin{array}{\|l\|} \hline \mathbf{P O} \\ \mathbf{1 0} \\ \hline \end{array}$ | $\begin{aligned} & \hline \mathrm{PO} \\ & \mathbf{1 1} \\ & \hline \end{aligned}$ | $\begin{aligned} & \hline \mathbf{P O} \\ & 12 \\ & \hline \end{aligned}$ | $\begin{aligned} & \text { PSO } \\ & 1 \\ & \hline \end{aligned}$ | $\begin{aligned} & \text { PSO } \\ & 2 \end{aligned}$ | $\begin{aligned} & \text { PSO } \\ & 3 \\ & \hline \end{aligned}$ |

JUSTIFATIONS FOR CO-PO MAPPING:

| Mapping | $\mathbf{L / H} / \mathbf{M}$ | Justificat <br> ion |
| :--- | :--- | :--- |
| C130.1- | H | Students will be apply the knowledge of mathematics and science to <br> solve various <br> fundamental problems in simple DC circuits. |
| C130.1- | L | Students will be able to formulate and analyze to find solution for <br> circuit related <br> problems in their higher semesters. |
| C130.1- | M | Students will be able to recognize the need for life long learning in <br> the broadest context <br> of techonological change in the area of Electric circuits |
| C130.2- | H | Students will be able to apply knowledge of magnetic circuits to <br> solve engineering <br> problems. |
| PO1 |  |  |

GAPS IN THE SYLLABUS - TO MEET INDUSTRY/PROFESSION REQUIREMENTS:

| SI. <br> No. | DESCRIPTION | PROPOSED <br> ACTIONS | RELEVANCE <br> WITH POs | RELEVANCE <br> WITH PSOs |

## Assignment -2

1. A100ohmresistorinserieswith120micro-Faradcapacitorisconnectedtoa 230V,50Hzsupply.Find1)CircuitImpedance2)Current3)Powerfactor 4) phase angle 5) Voltage across R 6) Voltage across C
2. A resistor of resistance 10 ohm , inductance 0.3 H and capacitance of 100 micro-Farad are connected across $230 \mathrm{~V}, 50 \mathrm{~Hz}$ mains. Calculate 1) Impedance 2) Current 3) Voltage across R,L,C 4) Power consumed 5) Power factor

## TUTORIAL OUESTIONS

## Module 1

1. A resistor of $5 \Omega$ is connected in parallel with a resistor of R1 $\Omega$. This combination is connected in series with an unknown resistor of $\mathrm{R} 2 \Omega$ and the complete circuit is then connected to 50 V dc supply. Calculate the values of R1 and R2, if the power dissipated by the unknown resistor R1 is 150 W with 5 A passing through it.
2. Determine the power dissipated in all the three resistors in the following figure using mesh current analysis.

3. 
4. Determine the current drawn from the supply using start delta conversion.

5. Distinguish between ideal voltage source and practical voltage source?
6. Differentiate between Constant voltage and constant current sources.
7. State and explain Kirchoff'slaws?
8. Calculate the power dissipated in 1 ohm resistor in the following figure using node voltage method.

9. Using star delta conversion, calculate the effective resistance between A and B of the following figure

10. Three resistors $\mathrm{R} 1=30 \mathrm{ohm}, \mathrm{R} 2=60 \mathrm{ohm}$, and $\mathrm{R} 3=10$ ohm are connected in star.

Obtain the equivalent delta circuit.
11. Three resistors $\mathrm{R} 1=20 \mathrm{ohm}, \mathrm{R} 2=90 \mathrm{ohm}$ and $\mathrm{R} 3=10 \mathrm{ohm}$ are connected in star. Obtain the equivalent delta circuit.
12. Calculate the current in each branch of the following circuit using mesh analysis.(2)

13. Solve the following circuit using mesh analysis and find ix

14. With a sample circuit, explain the step-by-step procedure of nodal analysis.
15. What are constant voltage and constant current sources? Voltage and current sources are mutually transferable. Explain. Derive the relationship between line and phase voltage in a star connected system.
16. Use nodal analysis to term network equations and solve the nodal voltages using matrix method. Also calculate the current in different branches.

## Module 2

1. A steel ring of $20 \mathrm{~cm}^{2}$ cross-section having a mean diameter of 50 cm is wound uniformly with 500 turns. Flux density of $1.0 \mathrm{~Wb} / \mathrm{m}^{2}$ is produced by 4000 ampere turns per metre. Calculate (i) the inductance (ii) the exciting current and (iii) the inductance when a gap of 1 mm long is cut in the ring, the flux density being 1.0 $\mathrm{Wb} / \mathrm{m}^{2}$. Neglect leakage and fringing.
2. A conductor of length 0.5 m moves in a uniform magnetic field of density 1.1 T at a velocity of $30 \mathrm{~m} / \mathrm{s}$. Calculate the induced voltage in the conductor when the direction of motion is inclined at $60^{\circ}$ to the direction of the field.
3. An iron ring of 15 cm mean diameter and $10 \mathrm{~cm}^{2}$ cross-section is wound with 200 turns of wire. For a flux density if $1 \mathrm{~Wb} / \mathrm{m}^{2}$ and a relative permeability of 500 , calculate the exciting current, inductance and energy stored when there is 2 mm air gap.
4. An iron ring of mean length 50 cm has an air gap of 1 mm and a winding of 200 turns. If the relative permeability of iron is 300 when a current of 1A flows through the coil, find flux density. Take permeability of air as $4 \pi \times 10^{-7} \mathrm{H} / \mathrm{m}$
5. A steel ring of circular cross section of 1 cm in radius and having a mean circumference of 94.3 cm has an air gap of 1 mm long. It is uniformly wound with an exciting coil consisting of 600 turns and excited with a current of 2.5 A . Neglecting magnetic leakage calculate (i) m.m.f. (ii) Reluctance (iii) Magnetic flux (iv) Flux density (v) Relative permeability of steel. Assume that steel part takes about $40 \%$ of total ATs.
6. Compare electric and magnetic circuits?(3)
7. Derive an expression for energy stored in a magnetic circuit.(2)
8. Distinguish between self-inductance and mutual inductance
9. With suitable example, explain statically and dynamically induced emf
10. Define coefficient of coupling in a magnetic circuit.
11. Explain Faraday's laws of electromagnetic induction and Lenz'slaws.

## Module 3

1. What are the advantages of three phase systems?
2. Derive an expression for three phase power in a star connected system.
3. Write the expression for three phase power in a delta connected system.
4. Explain the 2 wattmeter method of power measurement using the circuit arrangement.
5. Deduce the relationship between line and phase voltage in a star connected system.
6. Define and Derive the form factor of a pure sinusoidal waveform.
7. Explain the method for three phase power measurement in a star connected system using two wattmeter method with necessary diagrams.
8. Define peak factor and form factor of an alternating quantity.
9. Derive the rms and average value of a sinusoidal waveform.
10. Define and obtain the expression for power factor, active power, reactive power and apparent power of a series RLC circuit.
11. Prove that in a purely inductive circuit the current lags behind the applied voltage by 90 degree and the power consumed is zero.
12. A Series RC circuit takes a power of 7000 W when connected to $200 \mathrm{~V}, 50 \mathrm{~Hz}$ supply. The voltage across the resistor is 130 V .
13. Calculate:

|  | i)Resistance | ii)Current |
| :--- | :--- | :--- |$\quad$ iii) Power factor

ii. vi) Equations for instantaneous values of voltage and current.
14. An alternating voltage of $(80+\mathrm{j} 60) \mathrm{V}$ is applied to a circuit and the current flowing is $(-4+\mathrm{j} 10) \mathrm{A}$. Find (i) the impedance of the circuit, (b) the power consumed and (c) the phase angle.
15. A series RC circuit takes a power of 7000 W when connected to $200 \mathrm{~V}, 50 \mathrm{~Hz}$ supply. The voltage across the resistor is 130 V . Calculate a.) Resistance b.) Power factor c.) Current d.) Capacitance e.) Impedance of the circuit.
16. A 10 ohm resistor and 300 mH inductor are connected in series to a 230 V sinusoidal supply. The circuit current is 4A. Calculate the supply frequency and phase angle between current and voltage.
17. A $50 \Omega$ resistor in series with $120 \mu \mathrm{~F}$ capacitor is connected to 230 V 50 Hz supply. Find i) impedance ii) current iii) power factor iv) Voltage across the resistor v) voltage across the capacitor.
18. A $10 \Omega$ resistor $\& 400 \mu \mathrm{~F}$ capacitor are connected in series to a 240 V sinusoidal ac supply. The circuit current is 5 A . Calculate the supply frequency \& phase angle between current \& voltage.
19. A resistance of 10 ohm and an inductive reactance of 10 ohm are connected in series. Calculate the value of impedance and draw the impedance triangle
20. Three identical resistors of $20 \Omega$ each are connected in star to $415 \mathrm{~V}, 50 \mathrm{~Hz}$ three phase supply. Calculate (i) the total power consumed, (ii) total power consumed if they are connected in delta (iii) total power consumed, if one of the resistors is opened in both star connection and delta connections
21. Each phase of a delta connected load has a resistance of $25 \Omega$ and an inductance of
0.15 H . The load is connected across a $400 \mathrm{~V}, 50 \mathrm{~Hz}$, three phase supply. Determine the line current, power factor and power consumed
22. A balanced three phase star connected load is connected across a 400 V three phase ac supply. Power consumed by the load is measured using two wattmeter method. The readings of the two wattmeters are -500 W and 1500 W . Find the current drawn from the supply and the power factor of the load.
23. A balanced star connected load of $(8+\mathrm{j} 6)$ ohm per phase is connected to a three phase 230 V supply. Find the line current, power factor and power consumed by the load.
24. Three inductive coils, each with a resistance of 22 ohm and an inductance of .05 H are connected in (i) in star and (ii) in delta, to a three phase $415 \mathrm{~V}, 50 \mathrm{~Hz}$ supply.

Calculate
for each of the above case (i) phase current and line current and (ii) total power absorbed.
25. A 3 phase 4 wire 400 V system feeds three loads $10-\mathrm{j} 8 \Omega$ each connected in star. Calculate the line currents in each phase.
26. In the two wattmeter method of power measurement in a three phase circuit, the readings of the wattmeters are 4800 W and -400 W . Find the total power and power factor of the load, percentage slip. Supply frequency is 50 Hz .

## BASICS OF ELECTRONICS ENGINEERING

COURSE INFORMATION SHEET

| PROGRAMME: Artificial Intelligence and <br> Data Science | DEGREE: B.Tech |
| :--- | :--- |
| COURSE: BASICS OF ELECTRICAL AND <br> ELECTRONICS ENGINEERING | SEMESTER: 2 CREDITS: 4 |
| COURSE CODE: 100908/CO900F <br> REGULATION: 2020 | COURSE TYPE: CORE |
| COURSE AREA/DOMAIN: ELECTRICAL <br> AND ELECTRONICS ENGINEERING | CONTACT HOURS: 2 hours /Week. |
| CORRESPONDING LAB COURSE CODE <br> (IF ANY): | LAB COURSE NAME: ELECTRICAL AND <br> ELECTRONICS <br> WORKSHOP |

SYLLABUS (PART-II):

| UNIT | DETAILS | HOURS |
| :---: | :---: | :---: |
| 1. | MODULE 4 <br> Introduction to Semiconductor devices: Evolution of electronics - Vacuum tubes to nano electronics. Resistors, Capacitors and Inductors (constructional features not required): types, specifications. Standard values, color coding. PN Junction diode: Principle of operation, V-I characteristics, principle of avalanche breakdown. Bipolar Junction Transistors: PNP and NPN structures, Principle of operation, relation between current gains in CE, CB and CC, input and output characteristics of common emitter configuration. | 10 |
| 2. | MODULE 5 <br> Basic electronic circuits and instrumentation: Rectifiers and power supplies: Block diagram description of a dc power supply, Working of a full wave bridge rectifier, capacitor filter (no analysis), working of simple zener voltage regulator. Amplifiers: Block diagram of Public Address system, Circuit diagram and working of common emitter (RC coupled) amplifier with its frequency response, Concept of voltage divider biasing. Electronic Instrumentation: Block diagram of an electronic instrumentation system. | 8 |
| 3. | MODULE 6 <br> Introduction to Communication Systems: Evolution of communication systems - Telegraphy to 5G. Radio communication: principle of AM \& FM, frequency bands used for various communication systems, block diagram of super heterodyne receiver, Principle of antenna - radiation from accelerated charge. Mobile communication: basic principles of cellular communications, principle and block diagram of GSM. | 7 |
|  | TOTAL HOURS | N.A |

| 3. | Basic Electronic Devices, Circuits and Fundamentals/Kal. S/PHI Learning |
| 4. | Integrated Electronics/Millman J, Hawkins C and Parikhu C D/Tata McGraw Hill |
| 5. | Electronics Circuit Analysis and Design/ Neeman D.A/ Tata McGraw Hill |
| 6. | Microelectronic Circuits/Sedra A S and Smith K C/Oxford University Press |

COURSE PRE-REQUISITES: NIL

## COURSE OBJECTIVES:

| 1 | To get basic idea about types, specification and common values of passive and active <br> components. |
| :--- | :--- |
| 2 | To familiarize the working of diodes and transistors |
| 3 | To understand the working of rectifiers and amplifiers |
| 4 | To provide an overview of evolution of communication systems, and introduce the basic <br> concepts in radio communication |

## COURSE OUTCOMES:

| Sl. No. | DESCRIPTION |
| :--- | :---: |
| CO 1 | Describe working of a voltage amplifier. |
| CO 2 | Outline the principle of an electronic instrumentation system. |
| CO 3 | Explain the principle of radio and cellular communication. |

## CO-PO-PSO MAPPING:

JUSTIFICATION FOR CO-PO-PSO CORRELATION:

|  | PO1 | PO12 | PSO1 |
| :---: | :---: | :---: | :---: |
| CO1 | Apply the basic knowledge of passive and active components for understanding the working of a amplifier |  | Acquire basic knowledge of basic electronic components and its operation, needed for problem analysis |
| CO 2 | Acquire a basic knowledge of rectifiers, regulators and instrumentation | Motivate the students to further explore their knowledge to quickly adapt to technology changes | Basic understanding of voltage regulators \& instrumentation helps in analyzing wide range of problems |
| CO 3 | Apply the basic  <br> knowledge of radio <br> communication in  <br> solving problems  <br> encountered   | Motivate the students to further explore their knowledge to quickly adapt to technology changes | Knowledge of radio communication helps in development algorithms suitable for the mobile, IoT applications |

GAPS IN THE SYLLABUS - TO MEET INDUSTRY/PROFESSION REQUIREMENTS:

| SNO | DESCRIPTION | PROPOSED <br> ACTIONS |
| :--- | :--- | :--- |
| 1 | (Not identified) | (N. A.) |

## PROPOSED ACTIONS: TOPICS BEYOND SYLLABUS/ASSIGNMENT/INDUSTRY VISIT/GUEST LECTURER/NPTEL ETC

## TOPICS BEYOND SYLLABUS/ADVANCED TOPICS/DESIGN:

1. Hobby circuits to practice

| 26. | Mobile communication: Basic principles of cellular communications |
| 27. | Mobile communication: Principle and block diagram of GSM. |
|  |  |

## ASSIGNMENT QUESTIONS

## Assignment -1

1. Find the resistance value, the minimum and maximum resistance values expected from that resistance? Give the specifications of a resistor as follows:
a) Brown, Gray, Green, Silver
b) Brown, Red, Silver, Gold
c) Gray, White, Gray, Gold, Red
d) Orange, Violet, Yellow, Red, Brown
2. Calculate the DC resistance of a diode for the following values of $\mathrm{V}_{\mathrm{F}}$ and $\mathrm{I}_{\mathrm{F}}$ :
a) $\mathrm{V}_{\mathrm{F}}=0.5 \mathrm{~V}, \mathrm{I}_{\mathrm{F}}=50 \mu \mathrm{~A}$.
b) $\mathrm{V}_{\mathrm{F}}=0.55 \mathrm{~V}, \mathrm{I}_{\mathrm{F}}=500 \mu \mathrm{~A}$.

## Assignment 2

1. Explain the role of each component in the circuit of an RC coupled amplifier.
2. How does voltage amplification occur in an RC coupled amplifier?
3. Draw an explain the block diagram of an electronic instrumentation system.

Assignment 3 (Submit before Sep 4, 2021)
Max marks: 5marks
Problems on Module 6

1) What are the merits of AM compared to FM (any 2)? The carrier amplitude of a given AM wave is 5 V and the message signal amplitude is 3 V . Find the modulation index.
2) Define modulation index in $A M$ and compute the percentage of modulation, when the maximum amplitude is 10 V and minimum is 6 V .
3) A signal $\mathrm{m}(\mathrm{t})=5 \cos \left(2 \mathrm{pi} 10^{\wedge} 3 \mathrm{t}\right)$ frequency modulates a 1 MHz carrier to produce a frequency deviation of 4 kHz . Calculate i) modulation index of frequency modulation ii) frequency sensitivity kf in $\mathrm{Hz} / \mathrm{V}$.
4) The output signal from an AM modulator is: $u(t)=5 \cos (1800 \pi t)+20 \cos (2000 \pi t)+5 \cos (2200 \pi t)$ a) Determine the modulating signal $\mathrm{m}(\mathrm{t})$ and the carrier $\mathrm{c}(\mathrm{t})$.b) Determine the modulation index. c) Determine the ratio of the power in the sidebands to the power in the carrier.

## PROFESSIONAL COMMUNICATION

COURSE INFORMATION SHEET (2020-2021)

| PROGRAMME: All programmes | DEGREE: B.TECH |
| :--- | :--- |
| COURSE: Professional Communication | SEMESTER: II |
|  | CREDITS: --- |
| COURSE CODE: 100908/EN200E | COURSE TYPE: MANDATORY NON- |
| REGULATION: 2019 | CREDIT |
| COURSE AREA/DOMAIN: HUMANITIES | CONTACT HOURS: 4 hours/week - 2 L + |
|  | 2P |

## SYLLABUS:

| UNIT | DETAILS |
| :--- | :--- |
| I | Use of language in communication: Significance of technical communication Vocabulary <br> Development: technical vocabulary, vocabulary used in formal letters/emails and reports, <br> sequence words, misspelled words, compound words, finding suitable synonyms, <br> paraphrasing, verbal analogies. Language Development: subject-verb agreement, personal <br> passive voice, numerical adjectives, embedded sentences, clauses, conditionals, reported <br> speech, active/passive voice. Technology-based communication: Effective email <br> messages, slide presentations, editing skills using software. Modern day research and <br> study skills: search engines, repositories, forums such as Git Hub, Stack Exchange, OSS <br> communities (MOOC, SWAYAM, NPTEL), and Quora; Plagiarism |
| II | Reading, Comprehension, and Summarizing: Reading styles, speed, valuation, critical <br> reading, reading and comprehending shorter and longer technical articles from journals, <br> newspapers, identifying the various transitions in a text, SQ3R method, PQRST method, <br> speed reading. Comprehension: techniques, understanding textbooks, marking and <br> underlining, Note-taking: recognizing non-verbal cues. |
| III | Oral Presentation: Voice modulation, tone, describing a process, Presentation Skills: Oral <br> presentation and public speaking skills, business presentations, Preparation: organizing the <br> material, self-Introduction, introducing the topic, answering questions, individual <br> presentation practice, presenting visuals effectively. Debate and Group Discussions: |
| introduction to Group Discussion (GD), differences between GD and debate; participating |  |
| GD, understanding GD, brainstorming the topic, questioning and clarifying, GD |  |
| strategies, activities to improve GD skills. |  |

|  | CV preparation (differences between Bio-Data, CV and Resume), and Reports. Elements <br> of style, Common Errors in Writing: describing a process, use of sequence words, <br> Statements of Purpose, Instructions, Checklists. Analytical and issue-based Essays and <br> Report Writing: basics of report writing; Referencing Style (IEEE Format), structure of a <br> report; types of reports, references, bibliography. |
| :--- | :--- |
| LAB | Written: Letter writing, CV writing, Attending a meeting and Minute Preparation, <br> Vocabulary Building |
| LAB | Spoken: Phonetics, MMFS (Multimedia Feedback System), Mirroring, Elevator Pitch, <br> telephone etiquette, qualities of a good presentation with emphasis on body language and <br> use of visual aids. |
| LAB | Listening: Exercises based on audio materials like radio and podcasts. Listening to Song. <br> practice and exercises. |
| LAB | Reading: Speed Reading, Reading with the help of Audio Visual Aids, Reading <br> Comprehension Skills |
| LAB | Mock interview and Debate/Group Discussion: concepts, types, Do's and don'ts- intensive <br> practice |

## COURSE PRE-REQUISITES:

$\mathbf{1}$ A basic level ability to read, write and speak in English.
COURSE OBJECTIVES:

| $\mathbf{1}$ | Students should have their vocabulary augmented and be able to understand the basic rules of |
| :--- | :--- | :--- | grammar.

| $\mathbf{2}$ | Students should be able to employ reading strategies to effectively read and understand works <br> of literature and to critically analyse these texts. |
| :--- | :--- |
| $\mathbf{3}$ | Students should be able to create a presentation on a given topic and deliver it in front of an <br> audience using the correct pronunciation and diction as well as take part in a group <br> discussion with the same techniques. |
| $\mathbf{4}$ | Students should be able to list the different types of listening and speaking techniques and <br> employ these in their regular communication. |
| $\mathbf{5}$ | Students should be able to adopt effective writing strategies used for technical as well as non- <br> technical communication. |

COURSE OUTCOMES:

| NO | DESCRIPTION |
| :--- | :--- |
| CO1 | Develop vocabulary and language skills relevant to engineering as a profession. |
| CO2 | Analyze, interpret and effectively summarize a variety of textual content. |
| CO3 | Create effective technical presentations. |
| $\mathbf{C O 4}$ | Discuss a given technical/ non-technical topic in a group setting and arrive at <br> generalizations/consensus. |
| CO5 | Identify drawbacks in listening patterns and apply listening techniques for specific needs. <br> CO6Create professional and technical documents that are clear and adhering to all the necessary <br> conventions |

## MAPPING OF COURSE OUTCOMES TO PROGRAMME OUTCOMES:

|  | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO1 <br> 2 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| CO1 |  |  |  |  |  |  |  |  |  | 3 |  | 2 |
| CO2 |  |  |  |  |  |  |  |  |  | 1 |  | 3 |
| CO3 |  |  |  |  | 1 |  |  | 1 | 3 |  |  |  |
| CO4 |  |  |  |  |  |  |  |  |  | 3 |  | 1 |
| CO5 | 1 |  |  |  |  |  |  | 2 | 3 |  |  |  |
| CO6 | 1 |  |  |  |  | 1 |  |  | 1 | 3 |  |  |

## JUSTIFICATION:

| CO | PO | JUSTIFICATION |
| :--- | :--- | :--- |
| CO <br> 1 | PO6 | Knowledge and mastery of life skills will enable the student to effectively function <br> at both the professional and personal levels. |
|  | PO8 | The skills of analysis, logical reasoning and problem-solving will enable the student <br> to make the right decision when faced with moral dilemmas in personal and <br> professional life. |

|  | PO9 | Developing an awareness of the self, learning to work in groups and teams, and <br> learning about leadership enables the student to effectively carry out his <br> responsibilities at both the individual and team level. |
| :--- | :--- | :--- |
|  | PO10 | Developing an understanding of oneself, and learning the tools of effective <br> communication enables the student to become a successful communicator. |
| PO11 | Learning about problem-solving and decision making, and individual and team <br> work enables the student to become efficient leaders and managers. |  |
| PO12 | Understanding the importance of engaging in continuous personal and professional <br> development motivates the student to become a lifelong learner. |  |
| CO | PO9 | Gaining an insight into the self and learning to cope with emotions and stress will <br> help the student to be more effective at the individual level and as a team player. |
| 2 | PO12 | Understanding one's priorities and learning to set clear goals will motivate the <br> student to engage in lifelong learning. |
| CO | PO6 | Learning about and practising effective communication strategies will make the <br> student successful in interacting with others in both professional and personal life. |
| 3 | PO9 | Effective communication strategies will help the student to be more successful at <br> the individual level and in groups: as a leader and as a team player. |
| PO10 | Mastering the theoretical and practical aspects of communication will lay the <br> foundation for effective personal and professional communication. |  |
| CO | PO10 | Taking part in group discussions and developing the skills of listening and <br> responding to others' opinions helps the student to learn the rudiments of effective <br> group communication. |
| 4 | PO12 | By engaging in group discussions on contemporary topics the student will realize <br> the need to keep oneself abreast of current developments thereby engaging in <br> lifelong learning. |
|  | PO2 | The exposure to effective thinking and problem-solving techniques enables the <br> student to learn the rudiments of problem analysis. |
|  | PO3 | Having gained an insight into creative and critical thinking techniques, the student <br> will be better equipped to design and develop solutions. |
| 5 | PO4 | The student will learn how to apply logical and creative thinking as the situation <br> demands while encountering complex problems. |
| CO <br> 6 | PO6 | Learning about teamwork and leadership will help the student in both professional <br> and personal life. |
|  | PO9 | The theoretical framework and practical exposure provided will enhance the <br> efficiency of the student in individual and team contexts. |

GAPS/TOPICS BEYOND SYLLABUS/ADVANCED TOPICS/DESIGN:

|  | TOPICS | PROPOSED ACTION |
| :--- | :--- | :--- |

| $\mathbf{1}$ | Social skills | Presentation/Activity |
| :--- | :--- | :--- |
| $\mathbf{2}$ | Current Affairs and awareness | Activity |
| $\mathbf{3}$ | Industrial Knowledge and context | Presentation |
| $\mathbf{4}$ | Gender Sensitivity in communication | Presentation/Activity |
| $\mathbf{5}$ | Civic responsibilities | Presentation/Activity |

## PROGRAMMING IN C

## COURSE INFORMATION SHEET

| PROGRAMME: INFORMATION <br> TECHNOLOGY | DEGREE: BTECH |
| :--- | :--- |
| COURSE: PROGRAMMING IN C | SEMESTER: II CREDITS: 4 |
| COURSE CODE100908/CO200F <br> REGULATION: 2019$\quad$ COURSE TYPE: CORE |  |
| COURSE AREA/DOMAIN: <br> PROGRAMMING, DATA STRUCTURES <br> AND ALGORITHMS | CONTACT HOURS: 2+1(Tutorial) +2 <br> (Lab) $=5$ hours/Week. |
| CORRESPONDING LAB COURSE CODE <br> (IF ANY): NIL | LAB COURSE NAME: NIL |

## SYLLABUS:

| UNIT | DETAILS | HOURS |
| :--- | :--- | :--- |
| I | Basics of Computer Architecture: processor, Memory, Input\& Output <br> devices Application Software \& System software: Compilers, <br> interpreters, High level and low level languages Introduction to structured <br> approach to programming, Flow chart Algorithms, Pseudo code (bubble <br> sort, linear search - algorithms and pseudo code |  |
| II | Basic structure of C program: Character set, Tokens, Identifiers in C, <br> Variables and Data Types, Constants, Console IO Operations, printf and <br> scanf Operators and Expressions: Expressions and Arithmetic Operators, <br> Relational and Logical Operators, Conditional operator, size of operator, |  |
| Assignment operators and Bitwise Operators. Operators Precedence <br> Control Flow Statements: If Statement, Switch Statement, Unconditional <br> Branching using goto statement, While Loop, Do While Loop, For Loop, <br> Break and Continue statements.(Simple programs covering control flow). |  |  |
| III | Arrays Declaration and Initialization, 1-Dimensional Array, 2- <br> Dimensional Array String processing: In built String handling functions <br> (strlen, strcpy, strcat and strcmp, puts, gets) Linear search program, <br> bubble sort program, simple programs covering arrays and strings |  |
| IV | Working with functions Introduction to modular programming, writing <br> functions, formal parameters, actual parameters Pass by Value, <br> Recursion, Arrays as Function Parameters structure, union, Storage <br> Classes, Scope and life time of variables, simple programs using <br> functions | 7 |
| V | Pointers and Files Basics of Pointer: declaring pointers, accessing data <br> though pointers, NULL pointer,array access using pointers, pass by <br> reference effect File Operations: open, close, read, write, append <br> Sequential access and random access to files: In built file |  |

|  | handlingfunctions(rewind() ,fseek(), ftell(), feof(), fread(), fwrite()), <br> simple programs covering pointers and files. |  |
| :--- | :--- | :--- |
| TOTAL HOURS | $\mathbf{3 5}$ |  |

## Text Books

1. Schaum Series, Gottfried B.S.,Tata McGraw Hill,Programming with C
2. E. Balagurusamy, McgrawHill,Programming in ANSI C
3. Asok N Kamthane, Pearson, Programming in C
4. Anita Goel, Pearson, Computer Fundamentals

## Reference Books

1. Anita Goel and Ajay Mittal, Pearson, Computer fundamentals and Programming in C
2. Brian W. Kernighan and Dennis M. Ritchie, Pearson, C Programming Language
3. Rajaraman V, PHI, Computer Basics and Programming in C
4. Yashavant P, Kanetkar, BPB Publications, Let us C Course Contents and Lecture

## COURSE OBJECTIVES:

1 The objective of the course is to prepare the Engineering Graduates capable of writing readable C programs to solve computational problems that they may have to solve in their professional life. The course content is decided to cover the essential programming fundamentals which can be taught within the given slots in the curriculum

## COURSE OUTCOMES:

| SNO | DESCRIPTION |
| :--- | :--- |
| $100908 / \mathrm{CO} 200 \mathrm{G} .1$ | Analyze a computational problem and develop an algorithm/flowchart to find <br> its solution |
| $100908 / \mathrm{CO} 200 \mathrm{G} .2$ | Develop readable* C programs with branching and looping statements, <br> which uses Arithmetic, Logical, Relational or Bitwise operators |
| $100908 / \mathrm{CO} 200 \mathrm{G} .3$ | Write readable C programs with arrays, structure or union for storing the data <br> to be processed |
| $100908 / \mathrm{CO} 200 \mathrm{G} .4$ | Divide a given computational problem into a number of modules and develop <br> a readable multi-function C program by using recursion if required, to find <br> the solution to the computational problem |
| $100908 / \mathrm{CO} 200 \mathrm{G} .5$ | Write readable C programs which use pointers for array processing and <br> parameter passing |
| $100908 / \mathrm{CO} 200 \mathrm{G.6} 6$ | Develop readable C programs with files for reading input and storing output |

readable* - readability of a program means the following:

1. Logic used is easy to follow
2. Standards to be followed for indentation and formatting
3. Meaningful names are given to variables
4. Concise comments are provided wherever needed

CO-PO AND CO-PSO MAPPING

## JUSTIFICATIONS FOR CO-PO MAPPING

| Mapping | LOW/MEDI <br> UM/HIGH | Justification |
| :--- | :--- | :--- |
| 100908/CO2 <br> 00G.1-PO1 | H | Students will study the fundamental of programming by <br> analyzing a problem and develop an algorithm/ flowchart to find <br> its solution. |
| 100908/CO2 <br> 00G.1-PO2 | H | The students will be able to analyze a given complex problem <br> since they have to understand the problem in depth to write an <br> algorithm/ flowchart |
| $100908 / \mathrm{CO} 2$ | H | The students will be able to develop and design solution to |

| 00G.1-PO3 |  | complex problems and express the solution they have designed using flowchart/ algorithm/ pseudocode. |
| :---: | :---: | :---: |
| $\begin{aligned} & \text { 100908/CO2 } \\ & \text { 00G.1-PO4 } \end{aligned}$ | M | The students will be able to use the skills of algorithm design in design of experiments and interpretation of data |
| $\begin{aligned} & \text { 100908/CO2 } \\ & \text { 00G.1-PO6 } \end{aligned}$ | L | The students will be able to write algorithm / draw flowchart for a solution catering to the needs of the society. |
| $\begin{aligned} & \hline \text { 100908/CO2 } \\ & \text { 00G.1-PO10 } \end{aligned}$ | L | The students will be able to communicate the idea of their solution effectively in a step by step manner using algorithm or pictorially by using a flowchart. |
| $\begin{aligned} & \text { 100908/CO2 } \\ & \text { 00G.1-PO11 } \end{aligned}$ | L | The students will be able to write algorithm / draw flowchart for a solution catering to the needs of the society. |
| $\begin{aligned} & \hline \text { 100908/CO2 } \\ & \text { 00G.1-PO12 } \end{aligned}$ | M | The students will be able to use their algorithm writing / flowchart drawing skills whenever they need to design solutions to complex real life problems. |
| $\begin{aligned} & 100908 / \mathrm{CO} 2 \\ & 00 \mathrm{G} .2-\mathrm{PO} 1 \end{aligned}$ | M | The concepts of branching, looping and operators are fundamental to our engineering specialization of problem solving. |
| $\begin{aligned} & 100908 / \mathrm{CO} 2 \\ & 00 \mathrm{G} .2-\mathrm{PO} 2 \end{aligned}$ | M | The concepts of branching, looping and operators are needed in analyzing complex engineering problems. |
| $\begin{aligned} & 100908 / \mathrm{CO} 2 \\ & 00 \mathrm{G} .2-\mathrm{PO} 3 \end{aligned}$ | M | The concepts of branching, looping and operators are inevitable when designing solutions to complex problems. |
| $\begin{aligned} & \text { 100908/CO2 } \\ & \text { 00G.2-PO4 } \end{aligned}$ | L | The concepts of branching, looping and operators are used in the design of experiments and data interpretation. |
| $\begin{aligned} & \text { 100908/CO2 } \\ & \text { 00G.2-PO5 } \end{aligned}$ | L | The concepts of branching, looping and operators are useful in usage of different tools since every tool makes use of these fundamentals. |
| $\begin{aligned} & 100908 / \mathrm{CO} 2 \\ & \text { 00G.2-PO10 } \end{aligned}$ | L | The concepts of branching, looping and operators are used in the design of solutions which is efficient for communicating the design to others. |
| $\begin{aligned} & \hline 100908 / \mathrm{CO} 2 \\ & \text { 00G.2-PO12 } \end{aligned}$ | M | The concepts of branching, looping and operators are used in all areas of research as well as industry. |
| $\begin{aligned} & 100908 / \mathrm{CO} 2 \\ & 00 \mathrm{G} .3-\mathrm{PO} 1 \end{aligned}$ | M | The concepts of arrays and structure for data storage are fundamental to our engineering specialization of problem solving. |

## Programming in C:Tutorial -1

1. Write a c program to find the perfect numbers within a given number of range
2. Write a program in C to find the prime numbers within a range of numbers
3. Write a program in C to find the number and sum of all integer between 100 and 200 which are divisible by 9
4. Write a C program to find HCF (Highest Common Factor) of two numbers.
5. Write a C program to find the length of a string without using the library function.
6. Write a C program to print all natural numbers in reverse (from n to 1 ). - using while loop.
7. Write a C program to find frequency of each digit in a given integer

## Programming in C: Tutorial -2

1. Write a C Program to Copy a String
2. Write a C Program remove all characters in a string except alphabets
3. Write a C Program sort elements in the lexicographical order (dictionary order)
4. Write a program in C to count a total number of duplicate elements in an array
5. Write a program in C to find the maximum and minimum element in an array
6. Write a program in C to separate odd and even integers in separate arrays
7. Write a program in C to find the second largest element in an array

## LAB CYCLE

## LIST OF LAB EXPERIMENTS/ ASSIGNMENT QUESTIONS

## WEEK 1

1. Display "Hello World"
2. Read two numbers, add them and display their sum
3. Read the radius of a circle, calculate its area and display it
4. Evaluate the arithmetic expression $((\mathrm{a}-\mathrm{b} / \mathrm{c} * \mathrm{~d}+\mathrm{e}) *(\mathrm{f}+\mathrm{g}))$ and display its solution. Read the values of the variables from the user through console.

## WEEK 2 AND 3

1. Read 3 integer values and finds the largest among them.
2. Read a Natural Number and check whether the number is prime or not.
3. Read a Natural Number and check whether the number is Armstrong or not.

## WEEK 4

1. Read n integers, store them in an array and find their sum and average.
2. Read n integers, store them in an array and search for an element in the array using an algorithm for Linear Search.
3. Read $n$ integers, store them in an array and sort the elements in the array using Bubble Sort Algorithm.

## WEEK 5

1. Read a string (word), store it in an array and check whether it is a palindrome word or not.
2. Read two strings (each one ending with a $\$$ symbol), store them in arrays and concatenate them without using library functions.
3. Read a string (ending with a $\$$ symbol), store it in an array and count the number of vowels, consonants and spaces in it.

## WEEK 6

1. Read a string (word), store it in an array and obtain its reverse by using a user defined function.
2. Write a menu driven program for performing matrix addition, multiplication and finding the transpose. Use functions to (i) read a matrix, (ii) find the sum of two matrices, (iii) find the product of two matrices, (i) find the transpose of a matrix and (v) display a matrix.

## WEEK 7

1. Read four inputs representing four points in the Euclidean space, store these values in structure variables.
i) Compute the Euclidean distance between two pair of points.
ii) Find the sum of those two distance values.

2 . Using structure, read and print data of $n$ employees (Name, Employee Id and Salary)
3. Declare a union containing 5 string variables (Name, House Name, City Name, State and Pin code) each with a length of C_SIZE (user defined constant). Then, read and display the address of a person using a variable of the union.

## WEEK 8

1. Find the factorial of a given natural number ' N ' using recursive and non-recursive functions. (Last Day to complete all the pending programs till WEEK 8)

## WEEK 9

1. Do the following using pointers
i) Add two numbers
ii) Swap two numbers using a user defined function
2. Input and Print the elements of an array using pointers.
3. Compute sum of the elements stored in an array using pointers and user defined function.

## WEEK 10

1.Create a file and perform the following
i) Write data to the file
ii) Read the data in a given file $\&$ display the file content on console
iii) Append new data and display on console
2. Open a text input file and count number of characters, words and lines in it; and store the results in an output file.

## Additional Sessions Provided

1. Familiarization of Hardware Components of a Computer.
2. Familiarization of Linux environment - How to do Programming in C with Linux
3. Familiarization of console I/O and operators in C

## ENGINEERING PHYSICS LAB

COURSE INFORMATION SHEET- ENGINEERING PHYSICS LAB

| PROGRAMME: <br> ENGINEERING | DEGREE: BTECH |
| :--- | :--- |
| COURSE: ENGINEERING PHYSICS LAB | SEMESTER: 1 AND 2 <br> CREDITS: 4 |
| COURSE CODE: 100908/PH922S | COURSE TYPE: CORE |
| REGULATION: 2020 | CONTACT HOURS: 2 hours/Week. |
| COURSE AREA/DOMAIN: Engineering Physics | CORRESPONDING THEORY COURSE CODE <br> :100902/PH900B ,100906/PH900B |
| LAB COURSE NAME: Engineering <br> Physics Lab |  |

Preamble: The aim of this course is to make the students gain practical knowledge to correlate with the theoretical studies and to develop practical applications of engineering materials and use the principle in the right way to implement the modern technology.

Prerequisite: Higher secondary level Physics
Course Outcomes: After the completion of the course the student will be able to

| CO 1 | Apply modern instruments like CRO, strain gauge to measure the basic physical <br> quantities viz. frequency and amplitude of a wave pattern, strain etc. <br> Carryout measurement of wave pattern in a stretched string and the corresponding <br> frequency values using a Melde's string apparatus. |
| :--- | :--- |
| CO 2 | Determine the wavelength of monochromatic beam of light and thickness of micro-thin <br> object etc. by forming Newton's rings pattern and an air wedge fringe pattern. |
| CO 3 | Carryout the measurement of wavelength by diffraction of plane transmission grating and <br> the spectra formed by a monochromatic beam of light and a laser. |
| CO 4 | Determine the wavelength of a laser beam using the plane transmission grating. <br> Measurement of Numerical aperture of an optic fibre and evaluate the properties of a <br> solar cell and LED through its I-V characteristics |
| CO 5 | Determine the velocity of ultrasonic waves in liquid using ultrasonic diffracto meter. <br> Compare the magnetic moment of various magnets and determine the magnetic flux <br> density using deflection/vibration Magnetometer. |

| CO1.PO1 | Develop analytical/experimental skills and impart prerequisite hands-on experience for <br> engineering laboratories |
| :--- | :--- |
| CO1.PO5 | Review research literature to answer open questions assessed by viva |
| CO1.PO8 | Professional punctuality and understanding professional ethics by self-reading posters |
| CO1.PO9 | Effectively function individually and as a team in the laboratory |
| CO1.PO12 | Capture the current and relevant innovations in the respective branch |

| CO2.PO1 | Understand the need for precise measurement practices for data recording |
| :--- | :--- |
| CO2.PO5 | Review research literature to answer open questions assessed by viva |
| CO2.PO8 | Professional punctuality and understanding professional ethics by self-reading posters |
| CO2.PO9 | Effectively function individually and as a team in the laboratory |
| CO2.PO12 | Capture the current and relevant innovations in the respective branch |

| CO3.PO1 | Understand the principle, concept, working and applications of relevant technologies and <br> comparison of results with theoretical calculations |
| :--- | :--- |
| CO3.PO5 | Review research literature to answer open questions assessed by viva |
| CO3.PO8 | Professional punctuality and understanding professional ethics by self-reading posters |
| CO3.PO9 | Effectively function individually and as a team in the laboratory |
| CO3.PO12 | Capture the current and relevant innovations in the respective branch |

| CO4.PO1 | Analyze the techniques and skills associated with modern scientific tools such as lasers and <br> fiber optics |
| :--- | :--- |
| CO4.PO5 | Review research literature to answer open questions assessed by viva |
| CO4.PO8 | Professional punctuality and understanding professional ethics by self-reading posters |
| CO4.PO9 | Effectively function individually and as a team in the laboratory |
| CO4.PO12 | Capture the current and relevant innovations in the respective branch |

| CO5.PO1 | Develop basic communication skills through working in groups in performing the laboratory <br> experiments and by interpreting the results |
| :--- | :--- |
| CO5.PO5 | Review research literature to answer open questions assessed by viva |
| CO5.PO8 | Professional punctuality and understanding professional ethics by self-reading posters |
| CO5.PO9 | Effectively function individually and as a team in the laboratory |
| CO5.PO12 | Capture the current and relevant innovations in the respective branch |

## Mark distribution

| Total <br> Marks | CIE | ESE | ESE Duration <br> (Internal) |
| :--- | :--- | :--- | :--- |
| 100 | 100 | - | 1 hour |

## Continuous Internal Evaluation Pattern:

| Attendance | $: 20 \mathrm{marks}$ |
| :--- | :--- |
| Class work/Assessment/Viva-voce | $: 50 \mathrm{marks}$ |
| Endsemesterexamination(Internallybycollege) | $: 30 \mathrm{marks}$ |

End Semester Examination Pattern: Written Objective Examination of one hour

## LIST OF EXPERIMENTS

## (Minimum 8 experiments should be completed)

1. CRO-Measurement of frequency and amplitude of waveforms
2. Measurement of strain using strain gauge and wheatstone bridge
3. LCR Circuit - Forced and damped harmonic oscillations
4. Melde's string apparatus-Measurement of frequency in the transverse and longitudinal mode
5. Wavelength measurement of a monochromatic source of light using Newton's Rings method.
6. Determination of diameter of a thin wire or thickness of a thin strip of paper using air wedge method.
7. To measure the wavelength using a millimeter scale as a grating
8. Measurement of wavelength of a source of light using grating.
9. Determination of dispersive power and resolving power of a plane transmission grating
10. Determination of the particle size of lycopodium powder
11. Determination of the wavelength of $\mathrm{He}-\mathrm{Ne}$ laserorany standard laser using diffraction grating
12. Calculate the numerical aperture and study the losses that occur in optical fiber cable.
13. I-V characteristics of solar cell.
14. LED Characteristics.
15. Ultrasonic Diffractometer Wavelength and velocity measurement of ultrasonic waves in a liquid.
16. Deflection magnetometer-Moment of a magnet- Tan A position.

| Sat, 22-May- <br> 2021 | Experiment 1 | Experiment No.1 - The electrical <br> oscillator | COMPLETED |
| Sat, 29-May- <br> 2021 | Experiment 2 | Experiment No.2 - Melde's string <br> experiment | COMPLETED |
| Sat, 5-Jun-2021 | Experiment 3 | Experiment No.3 - Newton;s rings | COMPLETED |
| Sat, 26-Jun- <br> 2021 | Experiment 4 | Experiment No. 4- Spectrometer | COMPLETED |
| Sat, 17-Jul- <br> 2021 | Experiment 5 | Experiment No. 5- Laser grating | COMPLETED |
| Sat, 24-Jul- <br> 2021 | Experiment 6 | Experiment No. 6- Optical fiber | COMPLETED |
| Sat, 31-Jul- <br> 2021 | Experiment 7 | Experiment No. 7- Solar cell | COMPLETED |
| Sat, 7-Aug- <br> 2021 | Experiment 8 | Experiment No. 8- Ultrasonic <br> diffractometer | COMPLETED |
| Sat, 11-Sep- <br> 2021 | Experiment 9 | Lab exam | COMPLETED |

## LIST OF EXPERIMENTS

1. The electrical oscillator (series LCR circuit)
2. Newton's rings - wavelength measurement of a monochromatic light
3. Spectrometer - characteristic wavelengths
4. Ultrasonic diffractometer - wavelength of ultrasonic waves in a liquid (acoustic grating method)
5. The mechanical oscillator (melde's string)
6. Wavelength determination of laser using transmission grating
7. Identification of MPP of a solar cell using its I-V characteristics
8. To find the numerical aperture of an optical fiber
9. Transmission of data using light

Engineering Physics Lab cycle 1/1

| Sl No | Experiment | Name of the experiment |
| :--- | :--- | :--- |
| 1 | Experiment 1 | LCR circuit |
| 2 | Experiment 2 | Melde's string |
| 3 | Experiment 3 | Newton's rings |
| 4 | Experiment 4 | Spectrometer- Characteristic wavelengths |
| 5 | Experiment 5 | Laser Diffraction Grating |
| 6 | Experiment 6 | Solar Cell |
| 7 | Experiment 8 | Numerical Aperture |
| 8 |  | LiFi/Ultrasonic Diffractometer |

## OPEN QUESTIONS

## RLC CIRCUIT

1. What does it mean to have a flat frequency response curve?
2. How does a microwave cavity work as resonant circuit like an RLC circuit?
3. How does a Joule thief circuit work?

## CATHODE RAY OSCILLOSCSOPE

1. How can the brightness of the pattern on the screen of the cathode ray tube be changed?
2. How does a cathode ray tube in an LCD screen turn so bright?

## NEWTON'S RINGS

1. Why does the fringes in Newton's rings crowd together as the radius of the fringe increases?
2. Why are Newton's rings circular?
3. How does Newton explained Newton's rings with corpuscular theory of light?
4. How a source which has specific frequency of vibration is able to produce waves of different wavelength?

## AIR WEDGE

1. What happens when white or colored light is used for air wedge experiment?
2. What happens to the fringes in air wedge experiment when we apply stress?

## SPECTROMETER EXPERIMENT

1. What are the differences between wavelength division multiplexing and time division multiplexing?
2. Do gravity waves have different lengths or frequencies like electromagnetic waves?
3. Why does a grating act as a super prism?

## MALUS' LAW

1. A team of international researchers are working on developing a camera that can identify cancerous tissue. Which property of Mantis shrimp has inspired them?
2. Bats use echolocation to identify pray. But how do they navigate?

## BOSE EINSTEIN CONDENSATION

1. At densities greater than that supported by degeneracy, the material inside a black hole convert from fermions to bosons. What type of boson is it?
2. Why at high temperature and low density, all statistics predict equivalently?
3. Why does quantum particles lose their distinguishability?

## SCHRODINGER CAT PARADOX

1. Can gravity play a key role in destroying quantum superposition?
2. Will human teleportation ever possible?

## MELDE'S STRING EXPERIMENT

1. Why are standing waves formed only when the medium is vibrated at specific frequencies?
2. Why are nodes alone formed at walls or boundaries?
3. Why are only antinodes formed at the open ends of a pipe?

## LASER- DIFFRACTION GRATING

1. When we see an object, is it the diffracted image? If so, why we are not seeing more than one image at a time?
2. How can a photon having no mass and still travel?

## I-V CHARACTERISTICS OF A SOLAR CELL

1. What type of electrical current I produced by solar panels. AC or DC?
2. Can we use solar panels to power a DC electric motor? How?
3. What limits the efficiency of solar cells?
4. What are the differences between solar panels and solar collectors?

## NUMERICAL APERTURE OF AN OPTICAL FIBER

1. What happens when the numerical aperture of a fiber is zero?
2. How does the numerical aperture of a camera affect its resolution?

## ADVANCED QUESTIONS

1. Why do we have equivalence between mechanical and electrical oscillators?
2. Why do we prefer phosphors for the production of photons in a CRT?
3. What is the difference between a spectrum analyzer and a cathode ray oscilloscope?
4. How do some smart phones enable us to see all of the emission spectra of light sources?
5. How certain wavelengths of light are used in forensic applications?
6. Which wavelength of light may fight fatigue round the clock?
7. Why do interference fringes due to air wedge have equal thickness?
8. Can gravitational waves from two or many events interact and cause constructive or destructive interference?
9. Why do radio waves and gamma rays pass through walls but visible light does not?
10. Does sound waves exhibit polarization?
11. Does Higg's Boson undergo Bose-Einstein condensation?
12. Does quantum entanglement provide communication at a velocity faster than that of light?
13. During an earth quake, buildings with a certain height may collapse more easily. Why?
14. What is the analogy between standing waves and matter waves?
15. Can you connect two computers with a laser data link?
16. How can solar cells bring a paradigm shift in the next generation energy production?
17. How is it possible to send a forward and backward message along the same cable?

## ELECTRICAL \& ELECTRONICS WORKSHOP

## COURSE INFORMATION SHEET

| PROGRAMME: Electrical And Electronics Engineering | DEGREE: BTECH |
| :---: | :---: |
| COURSE: Electrical Workshop | SEMESTER: S2 CREDITS: 1 |
| COURSE CODE: 100908/CO922U REGULATION: 2020 UG | COURSE TYPE: LAB |
| COURSE AREA/DOMAIN: ELECTRICAL WORKSHOP | CONTACT HOURS: 1 hour/Week. |
| CORRESPONDING LAB COURSE CODE (IF ANY) NIL | LAB COURSE NAME: NIL |

SYLLABUS:

| UNIT | DETAILS | HOURS |
| :--- | :--- | :--- |
| I A | Identification of cables, wires and switches | 1 |
| 1B | Identification of fuses, MCB. ELCB | 1 |
| II | Wiring of simple light circuit for controlling light/ fan point. (PVC conduit wiring) | 1 |
| III | Wiring of light/fan circuit using Two way switches. (Staircase wiring) | 1 |
| IV | Wiring of Fluorescent lamps and light sockets (6A) with a power circuit for <br> controlling power device. (16A socket) | 1 |
| V | Wiring of power distribution arrangement using single phase MCB distribution <br> board with ELCB, main switch and Energy meter. |  |
| VI | Identify different types of batteries with their specifications. | 1 |
| VII | Demonstrate the Pipe and Plate Earthing Schemes using Charts/Site Visit. | 1 |
| TOTAL HOURS | 8 |  |

COURSEPRE-REQUISITES:

| C.CODE | COURSE NAME | DESCRIPTION | SEM |
| :--- | :--- | :--- | :--- |
| - | Fundamental <br> Physics | The course gives the students a general understanding of basic <br> electrical | - |

|  | (Grade XI \& XII) | and electronic circuits |  |
| :--- | :--- | :--- | :--- |
| - | Basic Mathematics | The course gives the students a general understanding of basic <br> mathematical calculations and problems | - |

## COURSE OBJECTIVES:

1 Electrical Workshop is intended to impart skills to plan and carry out simple electrical wiring. It is essential for the practicing engineers to identify the basic practices and safety measures in electrical wiring.

COURSE OUTCOMES:

| Sl. <br> No. | DESCRIPTION | BLOOMS <br> TAXONOMY <br> LEVEL |
| :--- | :--- | :--- |
| 1 | Demonstrate safety measures against electric shocks. | Knowledge <br> [Level 1] |
| 2 | Identify the tools used for electrical wiring, electrical <br> accessories, wires, cables, batteries and standard symbols | Comprehension <br> [Level 2] |
| 3 | Develop the connection diagram, identify the suitable <br> accessories and materials necessary for wiring simple lighting <br> circuits for domestic buildings | Application <br> [Level 3] |

MAPPING COURSE OUTCOMES (COs) - PROGRAM OUTCOMES (POs) AND COURSE OUTCOMES (COs) -PROGRAM SPECIFIC OUTCOMES (PSOs)

JUSTIFATIONS FOR CO-PO MAPPING

| Mapping | $\mathbf{L} / \mathbf{H} /$ <br> $\mathbf{M}$ | Justification |
| :--- | :---: | :--- |
| CO1-PO6 | H | Student will be able to develop wiring arrangements that meets the <br> specific needs with due consideration of the electrical safety aspects. |
| CO1-PO12 | L | Student will get an initiation to explore various protective measures <br> CO2-PO1 <br> MStudent will be able apply the knowledge about types of wires, cables <br> \& other accessories to propose innovative solutions in the area of <br> domestic wiring |
| CO2-PO10 | L | Students will be able to suggest appropriate back up supply based on <br> the specific application |

| CO3-PO1 | M | Student will be able to design wiring systems for domestic buildings <br> applying the knowledge engineering fundamentals |
| :--- | :---: | :--- |
| CO3-PO4 | L | Student will be able to analyze and solve the problems related to light <br> and power circuits. |
| CO3-PO6 | L | Students will be able to prepare estimate of wiring circuits considering <br> the economic aspects |
| CO3-PO8 | L | Will help the student for the better understanding of ethical principles <br> and responsibilities in the area of energy conservation. |
| CO3-PO9 | M | Students will conduct the experiments in groups thereby improving <br> their ability to work as a team |
| CO3-PO10 | M | Student will be able to identify and formulate engineering problems in <br> wiring |
| CO3-PO12 | M | Student will be able understand the need of energy conservation for <br> sustainable development |

## COURSE PLAN

| Day | Date | Experiment | Cycle |
| :--- | :--- | :--- | :--- |
|  | $22 / 05 / 2021$ | Introduction to EE Workshop |  |
| 1 | $29 / 05 / 2021$ | 1.1 Study of Electrical Shock | I |
| 2 | $5 / 6 / 2021$ | 1.2 Study of Wires, Cables and Switches, Fuse | I |
| 3 | $19 / 6 / 2021$ | 2 One lamp controlled by One switch | I |
| 4 | $26 / 6 / 2021$ | 3 Staircase wiring | I |
| 5 | $3 / 7 / 2021$ | 4.1 Study of MCB, MCCB, ELCB |  |
| 6 | $17 / 7 / 2021$ | Practice Tutorials | I |
| 7 | $24 / 7 / 2021$ | 4.2 Single phase distribution Board - Demo | I |
| 8 | $31 / 7 / 2021$ | 5 Wiring of Fluorescent Lamp, 6 A and 16 A plug | I |
| 9 | $7 / 8 / 2021$ | 6.1 Study of Batteries, 6.2 Study of Pipe and Plate Earthing | I |
| 10. | $04 / 09 / 2021$ | End Semester Exam |  |

## CYCLE I

1. Study of Electrical Shock, Wires, Cables and Switches
2. One lamp controlled by One switch
3. Staircase wiring
4. Study of fuses. MCB, ELCB \&Single phase distribution Board - Demo
5. Wiring of Fluorescent Lamp, 6 A and 16 A plug
6. Study of Batteries \& Study of Pipe and Plate Earthing

## LIST OF EXERCISES / EXPERIMENTS

1. a) Demonstrate the precautionary steps adopted in case of Electrical shocks.
b) Identify different types of cables, wires, switches, fuses, fuse carriers, MCB, ELCB and MCCB with ratings.
2. Wiring of simple light circuit for controlling light/ fan point (PVC conduit wiring).
3. Wiring of light/fan circuit using two way switches (Staircase wiring).
4. Wiring of Fluorescent lamps and light sockets (6A) with a power circuit for controlling power device. (16A socket)
5. Wiring of power distribution arrangement using single phase MCB distribution board with ELCB, main switch and Energy meter.
6. a) Identify different types of batteries with their specifications.
b) Demonstrate the Pipe and Plate Earthing Schemes using Charts/Site Visit.

## OPEN QUESTIONS

1. Draw the wiring of power distribution arrangement using single phase MCB distribution board with ELCB, Main switch and Energy meter.
2. Draw the circuit diagram for the measurement of voltage, current and power in single phase circuit using voltmeter, ammeter and wattmeter. Write the expression for power factor of the circuit.
3. In work area of kitchen the client desires to have one light and 5A plug point. Draw the circuit that satisfies the requirement with safety norms.
4. One lamp required at front yard and another at backyard of a house. Draw the layout and wiring diagram so that it can be controlled by one switch from bedroom.
5. Given three lamps, draw the layout and wiring diagram to operate the lamps in a sequential manner, i.e. only one lamp operates at a time.
6. One lamp required at front yard and another at backyard of a house. Draw the layout and wiring diagram so that, same can be controlled independently using two switches from bedroom.
7. A house owner wants one lamp at front veranda of the building. He requires the lamp to be operated from his bedroom as well as from his veranda. Draw the circuit with suitable layout.
8. House owner requires one lamp at veranda and one lamp at drawing room. But needs only one lamp to be bright at a time. Draw the wiring diagram with suitable layout.
9. Draw the wiring diagram which is meant for switching on the lamp one by one while going forward and switching off the lamp one by one while returning back.

## ADVANCED QUESTIONS

1. For the given layout having 2 lamps connected in parallel with one control switch, the minimum estimated cost in conduit wiring is

s
2. For the given layout having 2 lamps connected in series, the estimated cost in conduit wiring is

3. Estimated cost of given power circuit in casing and caping is---------------( length of each section $=20 \mathrm{~cm}$ )

4. For the given wiring diagram the estimated cost in conduit wiring is
----------------( length of each section $=20 \mathrm{~cm}$ )

5. In a house one lamp needs to be controlled from drawing room as well as veanda. Estimated cost of conduit wiring of the same for the given layout is

L

6. For the given layout the lamp is to be controlled from 2 different location. The estimated cost of the same in conduit wiring is

7. For the given condition which lamp will glow S1-ON, S2-UP, S3-DOWN

8. For the given condition which lamp will glow S1-ON, S2-DOWN, S3-DOWN

60W, 230V
Incandescent Lamp

9. For the given condition which lamp will glow S1-ON, S2-UP, S3 -UP

10. For the given condition which lamp will glow

S1-ON, S2-DOWN, S3-UP
60W, 230V
Incandescent Lamp

11. For the given condition which lamp will glow :S1-UP, S2-ON

12. For the given condition which lamp will glow :S1-DOWN, S2-ON

13. For the given diagram in which condition both the lamps become parallel

14. For the given diagram in which condition both the lamps become series

## ELECTRONICS WORKSHOP

## COURSE INFORMATION SHEET

| PROGRAMME: BTech in ECE | DEGREE: B. Tech |
| :--- | :--- |
| COURSE: Electronics Workshop | SEMESTER: 1 CREDITS: 1 |
| COURSE CODE: $100908 / C O 922 U$ <br> REGULATION: 2019 | COURSE TYPE: CORE |
| COURSE AREA/DOMAIN: Basics of <br> Electrical and Electronics Engineering | CONTACT HOURS: 2 hours /Week. |
| CORRESPONDING LAB COURSE CODE <br> (IF ANY): N.A | LAB COURSE NAME: N.A |

## SYLLABUS:

| UNIT | DETAILS |
| :---: | :--- |
| 1. | Familiarization/Identification of electronic components with specification <br> (Functionality, type, size, colour coding, package, symbol, cost etc. [Active, <br> Passive, Electrical, Electronic, Electro-mechanical, Wires, Cables, Connectors, <br> Fuses, Switches, Relays, Crystals, Displays, Fasteners, Heat sink etc.) |
| 2. | Drawing of electronic circuit diagrams using BIS/IEEE symbols and <br> introduction to EDA tools (such as Dia or XCircuit), Interpret data sheets of <br> discrete components and IC's, Estimation and costing. |
| 3. | Familiarization/Application of testing instruments and commonly used tools. <br> [Multimeter, Function generator, Power supply, DSO etc.] [Soldering iron, <br> Desoldering pump, Pliers, Cutters, Wire strippers, Screw drivers, Tweezers, <br> Crimping tool, Hot air soldering and de- soldering station etc.] |
| 4. | Testing of electronic components [Resistor, Capacitor, Diode, Transistor and <br> JFET using multimeter.] |
| 5. | Inter-connection methods and soldering practice. [Bread board, Wrapping, <br> Crimping, Soldering - types - selection of materials and safety precautions, <br> soldering practice in connectors and general-purpose PCB, Crimping.] |
| 6. | Printed circuit boards (PCB) [Types, Single sided, Double sided, PTH, <br> Processing methods, Design and fabrication of a single sided PCB for a simple <br> circuit with manual etching (Ferric chloride) and drilling.] |
| 7. | Assembling of electronic circuits using SMT (Surface Mount Technology) <br> stations. |

| 8. | Assembling of electronic circuit/system on general purpose PCB, test and <br> show the functioning (Any Two circuits). <br> 1. Fixed voltage power supply with transformer, rectifier diode, capacitor <br> filter, zener/IC regulator. <br> 2. Square wave generation using IC 555 timer in IC base. <br> 3. Sine wave generation using IC 741 OP-AMP in IC base. <br> 4. RC coupled amplifier with transistor BC107. |
| :---: | :--- |

## COURSE PRE-REQUISITES: NIL

## COURSE OBJECTIVES:

| 1 | To get basic idea about types, specification and common values of passive and active <br> components. |
| :--- | :--- |
| 2 | To familiarize the working of diodes and transistors |
| 3 | To understand the working of rectifiers and amplifiers |
| 4 | To provide an overview of evolution of communication systems, and introduce the basic <br> concepts in radio communication |

## COURSE OUTCOMES:

| Sl. No. | DESCRIPTION |
| :--- | :---: |
| CO 1 | Describe working of a voltage amplifier. |
| CO 2 | Outline the principle of an electronic instrumentation system. |
| CO 3 | Explain the principle of radio and cellular communication. |

## CO-PO-PSO MAPPING:

|  | Programme Outcomes (POs) |  |  |  |  |  |  |  |  |  |  |  |  | Programmespecific Outcomes (PSOs) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1 | 2 | 3 | 4 | 5 | 6 |  | 7 | 8 | 9 | 10 | 11 | 12 | 1 | 2 |  | 3 |

## Prepared by

Dr. Poornima S

## Approved by

## HoD (ECE)

## COURSE PLAN

| Sl. No | Module | Planned Date | Planned |
| :---: | :---: | :---: | :---: |
| 1 | 1 | 22-May-2021 | Familiarization and Testing of Passive components and Introduction to Tinkercad |
| 2 | 1 | 29-May-2021 | Familiarization and testing of Passive components Part 2 |
| 3 | 1 | 5-Jun-2021 | Familiarization and testing of Active components |
| 4 | 1 | 26-Jun-2021 | Familiarization of Switches,  <br> Electromechanical, Relays <br> Electronic components     |
| 5 | 1 | 17-Jul-2021 | Assembling of Electronic Circuit |

| SL. <br> NO | LIST OF EXPERIMENTS |
| :--- | :--- |
| 1 | Familiarization and Testing of Passive components and Introduction to Tinkercad |
| 2 | Familiarization and Testing of Passive components |
| 3 | Familiarization and Testing of Active Components |
| 4 | Familiarization of Switches, Electromechanical Relays and Other Electronic Components |
| 5 | Assembling of Electronic Circuit |
